Sharing-and-Visibility-Designer Updated Exam Dumps [2022] Practice Valid Exam Dumps Question

NO.51 Assuming Person Account is enabled in a Salesforce organization, which three objects can be configured as
“Controlled by Parent” in Sharing Settings?

Choose 3 answers
* Opportunity
* Order
* Asset
* Contact
* Case

NO.52 Ursa Major Solar recently enabled External Default Sharing and has told the Architect they want to allow for external users
to have the External Sharing Default set to Public Read-Only for a custom object.

What are two valid Internal Default sharing settings for the custom object? (Choose two.)
* Controlled by Parent
* Public Read Only
* Private
* Public Read/Write

NO.53 In a recruiting application, all users should be able to see and edit all candidate records, but interviewers should NOT have
access to the address of a candidate and should NOT be able to see the birth date of a candidate. How would a developer meet this
requirement?
* Use field-level security to control access to the Address and Birth Date fields
* Remove the Edit permission on candidate from the interviewer’s profile
* Set the organization wide default for candidates to Edit some fields
* Set the organization wide defaults for candidates to Read-Only

NO.54 Which two options are available to share a Report or Dashboard folder with other users in the Organization?

Choose 2 answers
* Profiles
* Public Groups
* Roles
* Teams

NO.55 Universal Containers is planning to pilot a new application to a small set of Sales Reps.

What is the optimal way to grant inly this Sales Reps access to the new functionality, while hiding ..
* Clone the Sales Rep profile, adjust settings, and assign the pilot users the new profile.
* Revoke access to legacy function in the Sales Rep profile and create a permission set for the ..
* Create a permission set to grant access to the new functionality and hide the old functionality.
* Create new user records for the pilot user that they will use for the pilot.

NO.56 Universal Containers (UC) uses a custom Visualforce page to display shipment tracking information (custom object, private OWD) to field manager and agents. The IT team wants to make sure that users have access to only the information that is allowed.

Which Apex method must be used to make sure only allowed fields are shown to the users’
* isReadable()
* isShowable()
* isAccessible()
* isViewable()

NO.57 Universal Containers (UC) has created a public group with certain Sales Engineers to help on complex deals and a sharing rule to grant access to these opportunities. Opportunity OWD is private.

What is the impact of these sharing settings?
* Subordinates of Managers who have Sales Engineers in the public group will also have access to these records.
* Sales Engineers that have a similar role of the Sales Engineers of the public group will also have access to these records.
* Sales Engineers Managers and their managers in the role hierarchy will also have access to these records.
* Sales Engineers direct reports will also have access to these records.

NO.58 Cosmic Service Solutions has a Salesforce organization with millions of case records. Several thousand records have been shared programmatically with support users and groups. Only the executive management and users in the support department of the company have access to the Case object. The company has a community for support users only. The IT Manager would like to change the organization-wide default setting of the Case object in order to reduce the performance impact of sharing recalculations. What should a Solution Architect recommend with regard to this modification?Choose 2 answers.
* The internal organization-wide default setting should be changed to Public Read/Write.
* The external organization-wide default setting should be changed to Public Read/Write.
* The internal organization-wide default setting should be changed to Public Read Only. (Your Answer)
* The external organization-wide default setting should be changed to Public Read Only.

NO.59 Universal Containers would like to create a custom team solution that can be used on a custom Loan object.

The following requirements must be met:

The Loan custom object should be set to Private in the Org-Wide Defaults.

Any user added to the Custom Team object should have Read Only access to the corresponding Loan record.

If the Custom Team record is marked as “Primary” then the corresponding user should have Read/Edit access to the corresponding Loan record.

Which two methods will allow the Architect to meet the requirements?

Choose 2 answers.
* Create a custom trigger on the Custom Team object that inserts or updates records in the Loan_share object.
* Create a criteria-based sharing rule on the Loan object that will share the Loan record with the appropriate user in the Custom Team object.
* Create Apex Sharing Reasons on the Loan object to identify the reason the Loan record was share.
* Create an owner-based sharing rule on the Custom Team object that will share the Loan record to the owner of the Custom Team record.

NO.60 Universal Containers (UC) wants all full-time internal employees to be able to view all leads.

A subset of Contractors and temporary employees should also be able to see leads. Which organization-wide default (OWD) approach should an architect recommend that will help UC implement these requirements?
* Implement a Public Read Only OWD on Lead.
* Implement a Public Read/Write/Transfer OWD on lead.
* Implement a Private OWD on Lead.
* Implement a Public Read/Write OWD on Lead.

NO.61 Universal Containers (UC) has a custom Apex class that enforces a business process and updates opportunities. UC has noticed that fields with field level security permission of read only on certain users’ profiles are being updated by this class.

How should the architect fix this problem?
* Add With Sharing keyword to the class,
* Put the code in an inner class that uses the With Sharing keyword.
* Use the IsUpdateable() Apex method to test each field prior to allowing update.
* Use the WITH SECURITY_ENFORCED keyword in the SOQL statement.

NO.62 A junior Account manager owns an account and creates a new opportunity to manage complex deal. She needs the help of the product specialist and solution engineer. Given the size of this deal, she knows the account is likely to be reassigned to a senior account manager in the near future. What is the optimal way for the junior account manager to share the opportunity, given the private sharing model?
* Manual Share on the Opportunity.
* Opportunity Team.
* Manual share on the Account.
* Create an Owner-based sharing rule.

NO.63 Universal Containers has a requirement to share Accounts automatically to the users at a field office. They currently have the following setup in their environment:

* Accounts are set to Private in the Org-Wide Default.

* The field office is specified by a lookup in the Account object.

* There are 400 field offices.

* The users in each field office are managed using public groups.

Based upon a lookup relationship field on the Account, how should the Architect meet this requirement?
* Use Manual Sharing to share the Account with the appropriate field office.
* Use Account Teams to share the Account with the appropriate field office.
* Use Programmatic Sharing to share the Account with the appropriate field office.
* Use Criteria-Based Sharing to share the Account with the appropriate field office.

NO.64 Cosmic Enterprises has set up a community with many users assigned to a profile with the Partner Community license. The organization-wide default setting for the Opportunity object has been set to ‘Private’. All opportunities that have reached the ‘Closed Won’ stage need to be shared with the users who have been assigned to the ‘Partner Executive’ role on a partner account. Which of the following solutions can be utilized for this requirement?Choose 1 answer.
* Create a permission to grant access to additional records
* Create a sharing rule based on criteria
* Create a sharing set and configure access for the Opportunity object
* Create a sharing rule based on record ownership

NO.65 In a recruiting application, a master-detail relationship has been defined between two custom objects, Job Applications (master) and Reviews (detail). Which statement is TRUE? Choose 2
* Review records may exist without an associated job application
* The master-detail relationship between Job Applications and Reviews is defined on the Job Application object
* Deleting a Job application record will delete associated review records (Missed)
* Review records will inherit ownership from the associated job application

NO.66 Susan posts a file to the chatter fees for a record of an object which OWD is private. Which two statements accurately describe who can view the file by default?

Choose 2 answers.
* Susan and users with the View All Data permission.
* Susan and users with access to the record.
* Susan and users with a shared chatter post link to the file.
* Susan only.

NO.67 Universal Containers is creating a custom Visualforce page to allow users to edit contact records. The developer has used an apex:outputField for the Phone field on the contact object. What is the expected behavior if a user without field-level security accesses the Visualforce page?
* The user encounters an error while saving the record.
* The output field is visible to the user.
* The user is able to enter a value into the Phone field.
* The field is automatically removed from the page.

NO.68 Universal Containers (UC) is a fast-growing company that sells containers globally. It has thousands of dealerships throughout the world where local dealers service containers. UCimplemented a new Partner Community for its dealers. Each dealership has a dealer manager who manages the service agents. The community-sharing model is private.

What is the optimal option to give dealer managers visibility to customer cases only raised by their service agents?
* Change external organization-wide default of case object to public read only.
* Create a sharing rule to share cases created by service agents with their dealer manager.

* Using the role hierarchy, the cases raised by service agents will be visible to their relevant dealer managers.
* Create a sharing set to share cases created by service agents with their dealer manager.

NO.69 Universal Containers is implementing a community of High-Volume Community users. Community users should be able to see records associated to their Account or Contact record. The Architect is planning to use a Sharing Set to provide access to the records. When setting up the Sharing Set, certain objects are not available in the list of Available Objects. Which two reasons explain why an object is excluded from the list of Available Objects in a Sharing Set?
* The object is a custom object, and therefore not available for a sharing set.
* The object’s Organization-Wide sharing setting is set to Public Read/Write.
* The object’s Organization-Wide sharing setting is set to Private.
* The custom object does not have a lookup to Accounts or Contacts.

NO.70 Which element is included in the security model for Force.com sites? (choose 2)
* Full CRUD permission on all custom objects (Missed)
* Read/Write permission on all standard objects
* Named Visualforce pages
* Restricted IP Ranges

NO.71 Many sales users with different user profiles recently complained about being unable to view certain fields on account records in Salesforce. Which page can be accessed by a system administrator in Setup to quickly determine which profiles, page layouts, and record types are assigned to certain fields on the Account object?Choose 1 answer.
* Field Updates
* Field Accessibility
* Fields
* Field-Level Accessibility
