Verified ACA-Operator dumps Q&As - Pass Guarantee or Full Refund [Jun-2022]

ACA-Operator PDF Dumps | Jun 01, 2022 Recently Updated Questions

QUESTION 20

Which of the following database connection methods does ApsaraDB for Redis support? (Number of correct answers: 2)

* DMS (Data Management Service)

* Aliyun-cli

* Redis-cli

* Sentinel

QUESTION 21

Which Alibaba Cloud service is an automated operations and maintenance (O&M) service to execute O&M tasks?

* Operation Orchestration Service (OOS)
* Maintenance Orchestration Service (MOS)
* Resource Orchestration Service (ROS)
* Resource Access Management (RAM)
Explanation

https://www.alibabacloud.com/help/doc-detail/120556.htm

QUESTION 22

Which Alibaba Cloud service is used to manage cloud computing resources including the deployment?
* Operation Orchestration Service (OOS)
* Maintenance Orchestration Service (MOS)
* Resource Orchestration Service (ROS)
* Resource Access Management (RAM)
Explanation

https://www.alibabacloud.com/help/doc-detail/28852.htm

QUESTION 23

Alibaba Cloud CloudMonitor is a service that monitors Alibaba Cloud resources and internet applications.

Which of the following functions are provided by CloudMonitor? (Number of correct answers: 4)
* Site monitoring
* Cloud product monitoring
* Custom monitoring
* Alerts
* Custom firewall
Explanation

https://www.alibabacloud.com/help/doc-detail/35170.htm

QUESTION 24

Alibaba Cloud ActionTrail is a service that monitors and records the actions of your Alibaba Cloud account, including the access to and use of cloud products and services through the Alibaba Cloud console, API operations, and SDKs.
* True
* False
Explanation

https://www.alibabacloud.com/help/doc-detail/28804.htm

QUESTION 25

Alibaba Cloud RocketMQ is typically used in scenarios where message publishing and consumption performance requirements are high. Which of the following are supported message types in Alibaba Cloud RocketMQ? (Number of correct answers: 3)
* Scheduled message
* Ordered message
* Batched message

* Transactional message
* Retried message

QUESTION 26

Alibaba Cloud ActionTrail is a service that monitors and records the actions of your Alibaba Cloud account, including the access to and use of cloud products and services through the Alibaba Cloud console, API operations, and SDKs.
* False
* True

QUESTION 27

Which database utility is suitable for automate perception, healing, optimization, O&M, and security assurance for databases?
* DMS
* DBS
* DTS
* DAS
Explanation

https://www.alibabacloud.com/help/doc-detail/64851.htm

QUESTION 28

Which of the following features are unique to Alibaba Cloud Container Registry, as compared with Docker Hub? (Number of correct answers: 2)
* Container Registry can automatically build new Docker images when source code changes.
* For source code hosted on websites outside China, Container Registry can use servers outside China to build Docker images, even when you are using a Container Registry instance in Mainland China.
* You can create and delete image repositories in different regions based on your needs.
* You can set your image repository access to public or private.

QUESTION 29

Alibaba Cloud Log Service allows you to store and search logs from a variety of sources, but has no built-in visualization capabilities.
* True
* False
Explanation

https://www.alibabacloud.com/help/doc-detail/102530.htm

QUESTION 30

When you use SQL statements to access tables in a database without an index configured, a full table scan will be performed. If a table contains a large amount of data, this kind of scan will access a large amount of data and consume a lot of the database’s resources. Which of the following options are best practices when creating database indexes? (Number of correct answers: 3)
* Add an index to a field that is frequently queried but does not frequently perform add, delete, or modify operations.
* Applies indices to fields to contain many records.
* A table should not contaiiAiore than 6 indexed fields.

* Apply indexing to fields of fixed length (preferably not long fields).
* Adhere to the rightmost prefix principle when using composite indexes

QUESTION 31

Which command is used to get the Docker daemon information?
* docker info
* docker version
* docker pull
* docker image
Explanation

https://docs.docker.com/engine/reference/commandline/info/

QUESTION 32

_____ is a fully-managed event-driven computing service that allows you to run code in an elastic and reliable way?
* Function Compute
* Serverless Workflow
* Elastic Compute Service (ECS)
* Batch Compute
Explanation

https://www.alibabacloud.com/help/doc-detail/52895.htm

QUESTION 33

A developer needs to use some sensitive business data and operational data in the process of developing a program, but the data should be protected (encrypted or anonymized) as much as possible. In order to facilitate and secure management of data encryption keys, the developer can use Alibaba Cloud Key Management Service (KMS) envelope encryption technology. Which of these statements is NOT correct, regarding KMS?
* Developers can generate a plaintext data key and a ciphertext data key by calling the GenerateDataKey interface.
* Envelope encryption is an encryption mechanism similar to digital envelope technology. The technology allows you to store, transfer and use encrypted data by encapsulating their Data Keys (DKs) in an envelope, instead of y encrypting/decrypting data directly with Customer Master Keys (CMKs).
* The user uses the master key created on KMS to encrypt and decrypt the generated data key.
* The master key generated by KMS is also kept by the user.

QUESTION 34

How does Cloud Config get permission to gather information about other Alibaba Cloud services?
* An Access Key
* A RAM Role
* By storing a copy of your password
* It gets automatic permission to access everything, because it is an Alibaba Cloud service
Explanation

https://www.alibabacloud.com/help/doc-detail/156642.htm

QUESTION 35

In Alibaba Cloud, a developer finds that the ECS instance he created does not have public IP assigned. The API method used was “CreateInstance”. Which of the following is the most likely reason?
* The developer did not call AllocatePublicIpAdress (an additional API call), which is needed to assign a public IP
* The CreateSecurityGroup API call was not made
* The CreateDisk API call was not made
* The ECS was not restarted after being created
Explanation

https://www.alibabacloud.com/help/doc-detail/25544.htm

QUESTION 36

Your company decided to replicate the whole cloud environment in another region and use it as a cross-region failover in disaster recovery scenarios.

Your current environment includes Elastic Compute Service (ECS) instances, Server Load Balancer (SLB) instances and Relational Database Service (RDS) instances. Which of the following statements is correct?
* You can provision multiple ECS instances in multiple regions, thereby leveraging automatic high availability across regions
* You can provision multiple SLB instances in multiple regions, thereby leveraging automatic high availability across regions
* You can use DNS to resolve domain names to the IP addresses of multiple ECS instances running in different regions
* You can use DNS to resolve domain names to the IP addresses of multiple SLB instances running in different regions
Explanation

https://cloudacademy.com/course/alibaba-server-load-balancer-1066/alibabas-high-availability/

QUESTION 37

Which of the following methods can NOT be used for operating Alibaba Cloud Elastic Compute Service (ECS) instances?
* CLI
* SDK
* Console
* CloudFormation
Explanation

https://www.alibabacloud.com/help/doc-detail/25422.htm

QUESTION 38

RAM supports custom policies.
* True
* False
Explanation

https://www.alibabacloud.com/help/doc-detail/93733.htm

QUESTION 39

Which of the following descriptions describes the (Security Token Service) STS service correctly? (Number of correct answers: 3)
* Through the STS service, RAM users or RAM roles can obtain a temporary token that allows them to call the Alibaba Cloud API

or use the web console
* A STS request consists of an access address, communication protocol, request method, request parameters and character encoding
* When calling the STS API, in order to ensure the safe calling of the API, Alibaba Cloud will authenticate each API request through a signature when each API call is made
* The STS service supports the use of both HTTP and HTTPS protocols

QUESTION 40

Cloud Config tracks configuration changes of your resources and evaluates configuration compliance.
* True
* False
Explanation

https://www.alibabacloud.com/help/doc-detail/127388.htm

QUESTION 41

Which of these log formats is currently supported by Alibaba Cloud’s ActionTrail?
* XML
* HTML
* JSON
* Markdown
Explanation

https://www.alibabacloud.com/help/doc-detail/140850.htm

QUESTION 42

Serverless Workflow allow you to orchestrate distributed tasks in sequence, branch, and parallel modes, and ensure that tasks are reliably coordinated according to your workflow logic. Which of the following service integration modes is not supported by Serverless Workflow?
* Request response mode
* Synchronization mode
* Asynchronous mode
* Waiting for callback mode
Explanation

Asynchronous mode is only possible with the combination of MNS

service.https://static-aliyun-doc.oss-cnhangzhou.aliyuncs.com/download%2Fpdf%2F122479%2FBest_Practices_

QUESTION 43

Tracing Analysis is used to analyze and diagnose performance bottlenecks in a distributed application architecture and make microservice development and diagnostics more efficient.
* True
* False
Explanation

https://www.alibabacloud.com/help/doc-detail/90277.htm

QUESTION 44

ApsaraDB for HBase is a cost-effective cloud-based intelligent SQL service that is of high scalability and compatible with the open source HBase.

* True
* False
Explanation

https://www.alibabacloud.com/help/doc-detail/49501.htm

Alibaba Cloud ACA-Operator Exam Syllabus Topics:

TopicDetailsTopic 1- Use Alibaba Cloud services and features to manage and assess resource utilization- Implement scalability and elasticity based on a given use case using Auto-Scaling and Load BalancerTopic 2- Network design for resource sharing between different accounts- Use Cloud Config to track resource configuration changes and evaluate configuration complianceTopic 3- Manage permissions for an enterprise organization on the cloud- Recognize and differentiate highly available and resilient architectures on Alibaba CloudTopic 4- Deploy and configure ECS on Alibaba Cloud, Set up remote access to ECS- Apply Alibaba Cloud Networking FeaturesTopic 5- Use Cloud Monitor to monitor application resource usage and health status- Cloud Architecture- High Availability and Fault Tolerance
