NEW QUESTION 23

You have set up a planning area and data is available. You adjust the necessary time profile settings and run the consistency check. Which settings can you change and still run a successful consistency check?

Note: There are 2 correct Answers to this question.

- * Change the description of the attributes in the time profile.
- * Remove an attribute assigned to the time profile level if the attribute is used in a planning level.
- * Change the past and future horizon of the levels in the time profile.
- * Add a new time profile level to the time profile.

NEW QUESTION 24

Which calculations can be processed within the pre-processing step in the forecasting model? Note:

There are 2 correct Answers to this question.

- * Correlations can be evaluated.
- * Promotion Sales Lift Ups can be deleted.
- * Rounding can be executed for the sales history.
- * Missing Values can be substituted.

NEW QUESTION 25

A time profile is defined with the levels of day, technical week, week, month, quarter, and year. What condition in configuration will allow you to have a different value in the current week, versus all other buckets?

- * IF(;“PERIODID5” =”,\$\$PERIODID5CU\$\$…)
- * IF(;“PERIODID3” =”,\$\$PERIODID3CU\$\$…)
- * IF(;“PERIODID4” =”,\$\$PERIODID4CU\$\$…)
- * IF(;“PERIODID2” =”,\$\$PERIODID2CU\$\$…)

NEW QUESTION 26

Which of the following settings can you use in your supply planning background job triggered from Excel? Note: There are 2 correct Answers to this question.

- * Target currency
- * Type of algorithm to use
- * UOM to ID
- * Planning unit

NEW QUESTION 27

While modeling costs for optimization, you are conscious of the necessity to respect inventory targets and meet demands in the short term. Which of the following are valid relationships between costs you must adhere to? Note: There are 2 correct Answers to this question.

- * Target inventory violation cost should be greater than inventory holding cost rate.
- * Target inventory violation cost should be less than max inventory violation cost.
- * Target inventory violation cost should be greater than discount for demand lateness.
- * Target inventory violation cost should be less than transportation cost rate.

NEW QUESTION 28

Which of the following are the key features of SAP Supply Chain Control Tower? Note: There are 2 correct Answers to this question.

- * Ability to create a feasible plan
- * Ability to use task and case management
- * Ability to balance demand and supply and attain financial targets
- * Ability to create smart alerts

NEW QUESTION 29

Which property of an attribute will allow it to be used as an attribute as a key figure?

- * Type TIMESTAMP
- * Type INTEGER
- * Type DECIMAL

* Type NAVCHAR

NEW QUESTION 30

You are modeling the introduction of a new product using Lifecycle Planning functionality in SAP IBP.

What is mandatory to create in your planning area for the setup of reference product(s) to work? Note:

There are 2 correct Answers to this question.

- * Definition of an attribute representing the product ID
- * Planning objects for the new product
- * Definition of an attribute representing the product description
- * Definition of Actual Sales business meaning for one key figure

NEW QUESTION 31

What differentiates the Create New (Simple copy) and the Create New with Dependencies (Advanced copy) functions of a planning area? Note: There are 2 correct Answers to this question.

- * Master data is only shared between the original and the new planning area when you use the Create New (Simple copy) function.
- * The planning view favorites are only copied when you use the Advanced copy.
- * Associated attributes are only shared between the original and the new planning area when you use the Create New (Simple copy) function.
- * A copy of the time profile is only created when you use the Create New with Dependencies (Advanced copy) function.

NEW QUESTION 32

You define fixing for a key figure. Which of the following functions are available for this key figure? Note:

There are 2 correct Answers to this question.

- * Fixing is possible for a certain quantity of a key figure value.
- * Fixing is possible for manually editable key figures.
- * Fixing is possible for system editable key figures.
- * Fixing is possible for a certain period, including all child values in the hierarchy.

NEW QUESTION 33

Where can we see the results of Time Series analysis in SAP IBP?

- * Time Series Property Attribute in Customer Product
- * Time Series Property Attribute in Product
- * Time Series Property Attribute in Customer Source
- * Time Series Property Attribute in Customer

NEW QUESTION 34

Why would you set up a cascading filter in the planning view? Note: There are 2 correct Answers to this question.

- * To filter using attributes that have a large number of values
- * To filter attributes based on other attribute filters
- * To filter attributes based on specific values
- * To filter data in an Application Job template

NEW QUESTION 35

Which of the following approaches could you take to reduce run times of an optimizer? Note: There are

2 correct Answers to this question.

- * Use a subnetwork ID to reduce the size of the problem.
- * Increase the use of incremental lot size beyond the frozen horizon.
- * Split into multiple planning areas to support weekly vs. daily planning needs.
- * Avoid using telescopic time buckets.

NEW QUESTION 36

You need to create time periods for the time profile in a planning area

a. What should you be aware of when executing the Create Time Periods application job?

- * The planning area with this time profile must be activated so that the application job can proceed.
- * This application job cannot be scheduled for immediate start.
- * A time profile has to be activated so that the application job can proceed.
- * This application job can be run for multiple time profiles at once.

NEW QUESTION 37

You want to restrict value entries outside of a specified range into a key figure. What setting will you use to achieve that goal?

- * By restricting data input in the Key Figure Configuration app
- * IBP -> Data Validation in IBP Formatting Sheet tab
- * Select Protect Active Worksheet in the About section of SAP IBP tab
- * IBP -> Lock Selected cells in IBP Formatting Sheet tab

NEW QUESTION 38

Which of the following stages can be modeled using scenarios from the S&OP planning cycle? Note:

There are 2 correct Answers to this question.

- * Demand review
- * Demand-supply balancing
- * Demand sensing stage
- * Data input review for inventory

NEW QUESTION 39

Which SAP IBP planning operator can be run to delete planning objects in a certain version?

- * Purge Non-Confirming Data
- * Purge Key Figure Data Outside Planning Area Planning Horizon
- * Purge Key Figure Data
- * Purge Master Data

NEW QUESTION 40

What setting is mandatory in the Manage Lifecycle Planning app when introducing a new product?

- * Define which key figure can be used as sales history for new products

- * Define which is the attribute ID for the Lifecycle profiles

NEW QUESTION 41

What function would you use to configure a year-to-date calculation?

- * Last Period Aggregation
- * Rolling Aggregation
- * Dynamic Rolling Aggregation
- * Cumulative Aggregation

NEW QUESTION 42

You are invited to review a problem with a customer's SAP IBP Excel template performance. What areas with the biggest potential performance impact would you focus on? Note: There are 2 correct Answers to this question.

- * Complex calculation graphs for key figures
- * Number of local members and complexity of calculations
- * Excessive IBP formatting in Excel UI
- * Number of analytics charts displaying key figures' values

NEW QUESTION 43

You create a planning filter using an SAP IBP Fiori app. Which of the following objects can it be applied to? Note: There are 2 correct Answers to this question.

- * Snapshot operator in the SAP IBP add-in for Microsoft Excel
- * Supply chain graph in Supply Chain Network app
- * Jobs in the Applications Jobs app
- * Planning view templates in the SAP IBP add-in for Microsoft Excel

NEW QUESTION 44

You are reviewing the master data types for supply planning. Which master data types are compound master data types? Note: There are 2 correct Answers to this question.

- * SOURCELOCATION
- * LOCATIONFR
- * SOURCECUSTOMER
- * SOURCEPRODUCTION

NEW QUESTION 45

You want to set up demand sensing to analyze demand changes in execution or close to execution windows. Which of the following conditions must you consider during the setup? Note: There are 2 correct Answers to this question.

- * Set up the forecast model to be executed at product-location level.
- * It is mandatory to load historical lag-based snapshot data.
- * The result generates sensed demand data at the monthly time granularity for the full time horizon.
- * At setup test the system to run the demand sensing (full) algorithm weekly and the demand sensing (update) on a daily basis.

NEW QUESTION 46

You are modeling a substitution scenario associated with a promotion. What are some of the Master Data parameters that you need to maintain to ensure desired results generated by the optimizer? Note:

There are 2 correct Answers to this question.

- * Loc-Prod Subst Valid-From Date
- * Promotion duration
- * Location Product Sub Cost Rate
- * Flag ‘Disable Substitution of Location Products’

NEW QUESTION 47

When you promote calculated and approved inventory parameters from SAP IBP for inventory, what other IBP modules can be receiving them? Note: There are 2 correct Answers to this question.

- * SAP IBP for demand
- * SAP IBP for response and supply
- * SAP IBP for sales and operations
- * DDMRP

SAP C-IBP-2105 Certification Exam Topics:

Topic Areas Topic Details, Courses, Books **Demand Planning 8% - 12%** Create statistical forecast using historical data with basic methods. IBP200 (SAP IBP OD 2105) IBP600 (SAP IBP OD 2105) **Key Figures & Attributes > 12%** Create and use key figures and attributes. IBP200 (SAP IBP OD 2105) IBP300 (SAP IBP OD 2105) **Analytics and Reporting < 8%** Define and view information with user-defined charts and dashboards. IBP200 (SAP IBP OD 2105) IBP300 (SAP IBP OD 2105) **Solution Architecture < 8%** Describe the benefits of implementing SAP's Integrated Business Planning solution. IBP100 IBP200 (SAP IBP OD 2105) IBP300 (SAP IBP OD 2105) **Planning Operators & Application Jobs > 12%** Use Planning Operators. IBP300 (SAP IBP OD 2105) **Supply and Response > 12%** Configure supply planning, run various solvers to generate planning results IBP100 - IBP110 IBP200 (SAP IBP OD 2105) IBP700 (SAP IBP OD 2105)
