SAP C-SACP-2114 Exam Description:

The "SAP Certified Application Associate - SAP Analytics Cloud: Planning" certification exam verifies that the candidate possesses the fundamental and core knowledge required of the SAP Analytics Cloud Planning Consultant profile. This certification proves that

the candidate has an overall understanding and technical skills to participate as a member of a project team. This certification is recommended as an associate level qualification.

NO.10 You have an SAP Business Warehouse data source with 25 key figures and no account characteristic.

What must you do to import this data into an existing new type of planning model? Note: There are 2 correct Answers to this question.

- * Map the key figures to accounts during the import.
- * Include 25 measures in the planning model.
- * Include 25 accounts in the planning model.
- * Map the key figures to the measures during the import.

NO.11 You have a planning model with the following dimensions: account, product, profit center, date, and version. In a story, which new master data can you add on the fly? Note: There are 2 correct Answers to this question.

- * Product member
- * Hierarchy node
- * Profit center property value
- * Account member

NO.12 Which of the following actions on the date dimension are available in Value Driver Trees? Note: There are 2 correct Answers to this question.

- * Select the Day granularity.
- * Change the date filter for an individual node within the Value Driver Tree.
- * Change the date filter for the entire Value Driver Tree.
- * Specify a presentation date range.

NO.13 You need to plan with finance data from SAP S/4HANA in SAP Analytics Cloud. To get started, you need to import master data from SAP S/4HANA. You are following the steps recommended by SAP. From which source can you import master data from SAP S/4HANA?

- * CDS view
- * Calculation view
- * Dataset
- * InfoObject

NO.14 When you delete a planning model, what dimension types are always deleted? Note: There are 2 correct Answers to this question.

- * Version
- * Account
- * Organization
- * Time

NO.15 You have labor hours in an expense model and labor rates in the HR model. To calculate and store labor values (labor hours x labor rates) in the expense model, what must you do? Note: There are 2 correct Answers to this question.

- * Copy the labor rates into the expense model.
- * Blend labor hours and labor rates in the story.
- * Include the labor hours and labor rates in a dimension formula.
- * Look up the labor rates in an advanced data action.

NO.16 Which of the following can you use to create an SAP Analytics Cloud planning model? Note: There are 3 correct Answers to

this question.

- * Data source
- * Model
- * Story
- * Analytic application
- * File

NO.17 You saved data for a certain cost center and profit center combination. Later, an administrator created a validation rule that prevents saving data against that combination. What happens when you display the data in a story?

- * The data is deleted.
- * A warning message is displayed.
- * An error message is displayed.
- * The data is realigned.

NO.18 When you run a data action with the 'publish target version automatically' setting enabled, what changes to your data are published? Note: There are 2 correct Answers to this question.

- * Manual changes to the target version
- * Data action-specific changes to the target public version
- * Data action-specific changes to the private and public versions
- * Manual changes to the private and public versions

NO.19 What data can be exported from SAP Analytics Cloud to SAP S/4HANA? Note: There are 2 correct Answers to this question.

- * Master data attributes
- * Hierarchies
- * Activity prices
- * Statistical key figures

NO.20 You are importing from SAP S/4HANA into a planning model with pre-converted actuals turned on. What mappings are required to import both local and default currency?

- * Two measures
- * Two accounts
- * Two currencies
- * Two currency types

NO.21 Which SAP Analytics Cloud Machine Learning function provides performance indicators that can be used to evaluate the accuracy of a statistical model?

- * Smart Insights
- * Smart Predict
- * Smart Discovery
- * Smart Grouping

NO.22 In SAP Analytics Cloud, where can you apply data security ? Note: There are 2 correct Answers to this question.

- * Analysis authorizations
- * Model
- * Property
- * SAP Identity Management

NO.23 What are prerequisites for importing master data from an SAP S/4HANA system into SAP Analytics Cloud? Note: There are 2 correct Answers to this question.

- * The target dimension must be a private dimension.
- * The target dimension must be input enabled.
- * A CDS view must exist for the source data.
- * A data service must be active in the S/4HANA service catalog.

NO.24 Which account types allow you to display database values with the opposite sign in stories? Note: There are 2 correct Answers to this question.

- * INC
- * AST
- * LEQ
- * EXP

NO.25 Why would you decide to use an Analytic Application instead of a Story? Note: There are 2 correct Answers to this question.

- * To have fewer data action triggers
- * To do form-based data input
- * To use advanced data actions
- * To use data cell comments

NO.26 When you import data into a classic planning model, what can you do with category and version in data management? Note: There are 3 correct Answers to this question.

- * Use an existing category.
- * Create a new public version.
- * Use an existing version.
- * Create a new category.
- * Create a new private version.
