Q34. Which profile option is used to activate survivorship rules in Oracle Customer Data Management?

- * ZCH_ACTIVATE_SURVIVORSHIP
- * ZCH_ENABLE_SURVIVORSHIP
- * CDM_ENABLE_SURVIVORSHIP
- * CDM_ACTIVATE_SURVIVORSHIP

Q35. You are asked to create a custom field by using Application Composer in Oracle Sales Cloud. The field should contain a list of values that are populated from the actual data of another object.

What type of field can support this?

- * Record lists
- * Dynamic choice lists
- * Fixed choice lists
- * Formula fields

Explanation

Another field type similar to Fixed Choice List is the Dynamic Choice List field type. A dynamic choice list is a field that contains a list of values that are populated from the actual data of another object. You can add a dynamic choice list to a custom or standard object

Q36. Which two statements are true about merging requests for accounts and contacts in Oracle Customer Data Management? (Choose two.)

- * Merge requests are always passed on for approval to the assigned Data Steward Manager.
- * `Match Threshold`; determines if a record is included in a duplicate set.
- * The `Merge Request Enabled` profile option must be set to Yes.
- * `Merge Threshold`; determines if a record is included in a duplicate set.

Q37. Which statement is correct about Enterprise Data Quality cleansing configurations?

- * Multiple cleansing configurations can be active at a time.
- * One read-only cleansing configuration is delivered out of the box.
- * User-defined cleansing configurations are not supported.
- * The `ZCA_ADDRESS_CLEANSING` profile must be set to `Yes` to enable address cleansing.

Q38. Which two attributes are used by an Oracle Customer Data Management application to create references between source IDs and Oracle Sales Cloud database IDs? (Choose two.)

- * Source system reference
- * System Identifier
- * Source system code
- * Cross reference code

Explanation

You can set up source systems to identify the source of the data you are importing. Source systems are external sources of data that are used to import data into Oracle Sales Cloud. Source system references are used by the application to create references between source IDs and the Oracle Sales Cloud database IDs. You can configure source systems either by using the Manage Trading Community Source System task or by importing the source system information into Oracle Sales Cloud using the Source System Reference import object

Q39. Which two standard roles are available with Oracle Customer Data Management? (Choose two.)

- * Customer Data Steward
- * Data Steward Manager
- * Customer Data Analyst
- * Customer Data Manager

Q40. Your customer manages account data in three legacy systems. They asked you to develop survivorship rules in Oracle Customer Data Management that will pick one correct master record based on the following conditions:

1. Pick the master record that has the DUNS number populated.
2. If more than one record has the DUNS number, pick one based on the highest party ID.

Which option can be inserted at lines 2 and 5 to complete the IF-Condition survivorship rule to fulfill the requirement?

1. Pick DUNS number
2. `{IF … … … … .`
3. `master.DUNsNumberC isn't null }`
4. `masterPartyID is the maximum of masterPartyID where`

5. {…… and master.DUNSNumberC isn’t null}

- * master= HZ_ACCOUNT_FactType.AccountPartyVO
- * master= HZ_ORGANIZATION_FactType.OrganizationPartyVO
- * master= HZ_ACCOUNT_Type.PartyVO
- * master= HZ_ORGANIZATION_FactType.AccountVO

Q41. What is the name of the provisioned object that is used to define the address cleansing process for Account?

- * Organization
- * Account
- * Customer
- * Party

Q42. Which agreement rule prevents a contact record owned by an internal user from merging with a contact record owned by a partner user?

- * CUST_CONTACT_INTERNAL_PARTNER_OWN_VETO
- * PARTNER_CONTACT_VETO
- * CUST_CONTACT_DIFF_RESOURCE_ORG_VETO
- * CUST_CONTACT_INTERNAL_PARTNER_ORG_VETO

Q43. In Oracle Customer Data Management, which role comes with complete access privileges to personally identifiable information?

- * Security Manager
- * Sales Representative
- * Sales Manager
- * Sales Administrator

Q44. Which two types are available when registering a source system in Oracle Customer Data Management?

(Choose two.)

- * Hub system
- * Customer system
- * Purchased system
- * Party system
- * Spoke system

Q45. Which two steps would you perform to define data in an enriched account or contact? (Choose two.)

- * Select “Auto fill Blank Fields in Record” to update all blank Sales Cloud fields with data from Social and Insight Cloud service.
- * Select “Customize Settings by Field” to define what data should be updated for each field in the enriched account or contact.
- * Select a hybrid of both approaches. It is the choice of the user who is enriching the data using Social Data and Insight Cloud Service.
- * You do not have any option to configure this. It is available out of the box.
- * Select a hybrid of both approaches. It is the recommended approach for simplicity.

Q46. Which task is used to configure Oracle Enterprise Data Quality (EDQ) when using it with Oracle Customer Data Management?

- * Manage Data Quality Configurations
- * Manage Customer Data and Data Quality Configurations
- * Manage Server Configurations

* Manage Enterprise Data Quality Configurations

Q47. A reputable banking industry customer is implementing Oracle Customer Data Management to centralize and achieve 360-degree account information from multiple sources. They have the following unique requirements:

- * The system should be able to carry out duplicate identifications and duplicate merge process automatically.
- * The system should provide the ability for a central administrator to review and approve merge records before carrying out duplicate merge process.

How can these be configured in Oracle Customer Data Management?

- * Set up the customer merge requests profile option CDH_CUSTOMER_MERGE_REQUESTS.
- * Set up the user merger requests profile option ZCH_USER_MERGE_REQUESTS.
- * Define Groovy rules and trigger workflows with approval hierarchy before automerger.
- * Oracle Customer Data Management does not support such approvals before merge and cannot be configured.

Q48. What dictionary name is used for the Sales Cloud functional area to configure agreement rules in Oracle Customer Data Management?

- * CDH_PARTIES
- * HZ_PARTIES
- * DOOPartyMerge
- * CX_PARTY_AGG

Q49. Your customer is implementing Oracle Sales Cloud and Oracle Customer Data Management and is planning to manage account and contact information with greater accuracy. You are called on as a data specialist to advise about the import of contacts related to the customer's account.

Which two need to be provided to load related account contact records? (Choose two.)

- * PartyOrigSystem
- * PartyOrigSystemReference
- * ContactOrigSystem
- * ContactOrigSystemReference
- * ContactPartyOrigSystem

Q50. Which Administrator profile option should be configured for real-time account or contact enrichment?

- * DAAS_PRODUCTION_MODE at the site level Yes
- * DAAS_PRODUCTION_MODE at the site level No
- * DAAS_PRODUCTION_MODE at the user level No
- * DAAS_PRODUCTION_MODE at the user level Yes

Explanation

Q51. You have been asked by a customer implementing Oracle Sales Cloud and Data Quality to explore a system process on duplicate account identification.

- * The business process states that they require possible duplicate identification at the time of account creation.

* The expectation is that the application notifies potential duplicates while creating the account.

As an implementation advisor, which two options do you suggest to fulfill the requirements?(Choose two.)

- * The duplicate identification notification feature can be enabled by using the OSC_ACC_EXACT_NAME_MATCH profile.
- * The duplicate identification notification feature can be enabled by using the OSC_ACC_DUP_NOTIFICATION profile.
- * The duplicate identification notification feature needs Oracle Customer Data Management.
- * The duplicate identification notification feature can be enabled by using the ZCM_ACC_DUP_NOTIFICATION profile.
- * The duplicate identification notification feature can be enabled by using the ZCM_ACC_EXACT_NAME_MATCH profile.

Q52. In Oracle Sales cloud, a Sales Cloud object can have a maximum of how many fields?

- * 725
- * 675
- * 325
- * 625

Q53. Your customer is implementing Oracle Sales Cloud and Oracle Customer Data Management and is planning to import address child records by using the Account-Simplified View hierarchical object.

Which profile option needs to be set to Yes; at the site level to make the Address child object mandatory?

- * CDM_IMPORT_ACCOUNT_ADDRESS_MANDATORY
- * ZCA_IMPORT_ACCOUNT_ADDRESS_MANDATORY
- * ZCA_ACCOUNT_ADDRESS_REQUIRED_ENABLED
- * CRM_ACCOUNT_ADDRESS_REQUIRED_ENABLED

Q54. What can be used to configure Data Import tasks?

- * Grouped File-Based Data Import
- * Managed File-Based Data Import
- * Define File-Based Data Import
- * File-Based Data Import

Explanation

For the customer hierarchy business object, you must use the File-Based Data Import feature. You prepare XML or text source data files, such as CSV, in a form that is suitable for a file-based import. The file-based import process reads the data in your source file, populates the interface tables according to your mapping, and imports the data into the application destination tables. The Define File-Based Data Import Setup and Maintenance task list includes the tasks that are required to configure the import objects, to create source file mappings, and to schedule the import activities. You submit file-based import activities for each import object
