Duration:180 minsLanguages:EnglishSample Questions: SAP C\_C4H450\_04 Exam Sample Question Cut Score:66%Exam:80 questions

### SAP C\_C4H450\_04 Exam Description:

The 'SAP Certified Integration Associate - SAP Cloud for Customer' certification exam verifies that the candidate possesses fundamental knowledge to be able to integrate SAP Sales and SAP Service Cloud with SAP S/4HANA, SAP ERP or SAP CRM using SAP Cloud Platform Integration. This certificate proves that the candidate has fundamental understanding within the Integration Consultant profile and is able to apply the associated prerequisite skills practically under supervision of an expert consultant in a project environment.

### NEW QUESTION 34

In the process of SSL handshaking, by which of the following CAs must the client certificate be signed?

- \* By the root CA provided by the server
- \* By the CA provided in the intermediate issuer
- \* By every CA provided in the server list
- \* By any CA provided in the server list

### NEW QUESTION 35

Which prepackaged integration scenarios use SOAMANAGER-configured Web services in SAP CRM to integrate with SAP Cloud for Customer?

- \* E-mail and sales document print preview
- \* Pricing and customer fact sheet
- \* Employee and attachment
- \* Quote and lead

### NEW QUESTION 36

What security features of SAP Web Dispatcher do you use when integrating SAP Cloud for Customer with on-premise solutions?

Note: There are 3 correct Answers to this question.

- \* Threat notification
- \* Certificate forwarding
- \* Security log
- \* SSL termination
- \* SSL user mapping

### NEW QUESTION 37

While monitoring messages in SAP Cloud Platform Integration, you see the following error:

[NoArtifactDescriptorFoundForArtifactName]:No artifact descriptor found for artifactName C4C\_0M1R00R\_TR16. What could be the problem? Note: There are 2 correct Answers to this question.

- \* The authentication artifact name was spelled incorrectly in the integration flow configuration.
- \* The basic authentication artifact was not deployed
- \* The client certificate uploaded into the integration flow has no credentials.
- \* The SAP Cloud Platform Integration certificate has expired.

### NEW QUESTION 38

What are the advantages of data filtering in the middleware? Note: There are 2 correct Answers to this question.

- \* No BAdI implementation needed in source or target system
- \* Performance enhancement independent from increased data loads
- \* Uniform implementation independent of the back-end system
- \* Protection of sensitive customer data

### NEW QUESTION 39

You want to integrate SAP Cloud for Customer with SAP ERP using SAP Cloud Platform Integration. What information should you provide in the path field in the outbound communication arrangement?

- \* The path of the communication system

- \* The path of the SAP ERP IDoc service
- \* The path of the reverse proxy
- \* The path of the deployed integration flow

#### **NEW QUESTION 40**

Which of the following interfaces between SAP CRM and SAP Cloud for Customer in the prepackaged integration content is bidirectional?

- \* Opportunity to Opportunity
- \* Ticket to Ticket
- \* Service request to service request
- \* Sales quote to sales quote

#### **NEW QUESTION 41**

When using certificate-based authentication for sending messages from SAP S/4HANA to SAP Cloud for Customer, which certificate needs to be imported into the integration flow within SAP Cloud Platform Integration?
