QUESTION 31

You are helping a manager to translate business requirements into a Jira project configuration. The manager wants users to indicate which systems are impacted by a bug. You are unsure if systems should be configured as components or as a custom field.

Select two situations in which components must definitely be used rather than a custom field. (Choose two.)
* Assignee must be set based on the selected system.
* Users must be able to select multiple systems.
* Systems must be required on the screen.
* Systems must be managed by project administrators.
* Systems must be exportable to CSV.
* Systems must have a default value.

QUESTION 32

Teresa is able to see the Start Progress transition but not the Approve transition on an issue. Her co-worker is able to see both.

Identify two possible causes why Teresa can NOT see the Approve transition. (Choose two.)
* Teresa is not listed in the correct security level for the issue.
* Teresa does not have the Transition Issues permission.
* Teresa is not in the correct group or project role.
* Teresa does not meet the condition on the Approve transition.
* Teresa does not have the correct global permission.
* Teresa does not have the correct Application access.

QUESTION 33

View the extract of a Jira Software Scrum project’s permission scheme shown.

Permission	Granted to
Administer Projects	Project role: Administrators
Browse Projects	Application access: JIRA Software
Close Issues	
Resolve Issues	
Transition Issues	Application access: Any logged in user

The project uses a simplified workflow.

Who can drag and drop issues to the Closed column on the board?
* only the board administrator
* any user with Jira Software application access
* nobody
* any logged in user
* only members of the Administrators project role

QUESTION 34

The Jira administrator has just created a new project based on the Task management project template.

Which Jira feature will be available in this project by default?
* Issue security levels
* Release Hub
* Ranking of standard issue types
* Issue analysis reports
* Epic issue type

QUESTION 35

Your Scrum Software type project only uses a single shared workflow. The resolution needs to be set manually during the Fix transition.

As a project administrator, how can you achieve this?
* Add the Resolution field to all project screens.
* Check the Set Resolution option on the target status in your board configuration.
* Request a post-function to be configured for the Fix transition.
* Request a screen with the Resolution field to be associated with the Fix transition.
* Add the Resolution field to the screen associated with the Fix transition.

QUESTION 36

All projects use only a single simplified workflow which has three statuses (Open, In Progress, Closed) and all global transitions.

You need to find all issues that were in the Closed status at some point in their lifecycle.

Select the correct JQL query.
* status CHANGED FROM “In Progress” TO Closed
* status = Closed OR (status WAS Closed AND status = Open)
* status WAS Closed
* status CHANGED TO Open

QUESTION 37

There is a condition on the Start Progress transition in your workflow, which restricts the transition to users in the Developers role only. All other transitions are available to all users. There is a new requirement to allow all users to execute the Start Progress transition. Your workflow is not shared. As a project administrator, what should you do to meet the requirement?
* Edit the existing Start Progress transition to remove the condition.
* Delete the existing Start Progress transition and replace with a new one.
* Edit the existing Start Progress transition to remove the validator.
* Update the Transition Issues permission in the permission scheme.

QUESTION 38

Elaine is the project administrator for the Finance project.

The team requests a brand new field called Currency. It must be added to the screen used on the Approval transition.

How can these requirements be met?
* Elaine can create the field and add it to the screen.
* A Jira administrator must create the field and add it to the screen.
* A Jira administrator must create the field but Elaine can add it to the screen.
* Elaine can create the field but a Jira administrator must add it to the screen.

QUESTION 39

Below you are shown an extract of a field configuration used by all issue types in your project.

Name	Required	Renderers	Screens
A detailed description	Yes	Wiki Style Renderer	📄 1 screen

The field ‘A detailed description’ is a custom field of type Text field (multi-line).

Which two statements are true? (Choose two.)
* Users will be able to format text in the field.
* The field can only be used in combination with the Description system field.
* The field is mandatory in each issue type used in the project.
* The project is configured to use only a single screen.
* The maximum text length is limited to 100 characters.

QUESTION 40

Jill is the project administrator of the SOFTWARE project.

She has the following requirements:

– A Testing status should be added to the workflow used by all issue types in her project.

– Only developers should be able to transition issues into the Testing status.

She consults the Workflows section of her project settings page and finds out that the workflow scheme is used in 2 projects, the SOFTWARE and the HARDWARE project. Luckily, she is also a project administrator of the HARDWARE project.

Which of the following statements is true?
* She can implement the desired workflow changes if she has the Extended project administration permission in both projects.
* She can implement the desired workflow changes since she is the project administrator in both projects.
* She will only be able to add the new status to the workflow but won’t be able to implement the desired restriction.
* She will not be able to perform any of the changes and has to contact a Jira administrator.

QUESTION 41

Max and Emma both have Jira Software application access, and they are members of the same groups and project roles in the DEV project.

However, Max can rank issues on the project’s Kanban board, while Emma cannot.

Which configuration will definitely explain the observed behavior?
* Max and Emma have different global permissions.
* Only Max has a valid Jira Software license.
* Only Max is a project administrator of the DEV project.
* Max and Emma are associated with different security levels.
* Only Max has been granted the Schedule Issues permission in the DEV project.
* Max is a component lead and Emma is a project lead in the DEV project.

QUESTION 42

A Jira project uses a single issue type.

Alana complains that she is not able to see the custom field Approval Board when she views a specific issue. She can see the field on other issues in the project. You check the screen configuration and confirm that the field is on the correct screen.

Why does Alana NOT see the field on that specific issue?
* The field is hidden in the field configuration.
* The field was disabled by a Jira administrator.
* The field has no value at the moment.
* The field is hidden by the workflow status.
* The field is hidden by a security level.

QUESTION 43

Your coworkers, Jill and Dave, want you to create a filter and a corresponding filter subscription to run every morning at 8 AM.

For the query result, they each want to receive a list of only their own issues that were assigned to them in the last 8 hours.

Which JQL query will you use in the filter?
* assignee in (Jill,Dave) AND created >= -8h
* assignee changed TO currentUser() AFTER startOfDay()
* assignee changed TO currentUser() >= -8h
* assignee changed TO (Jill,Dave) >= -8h
* assignee = Jill OR assignee = Dave AND created AFTER startOfDay()

QUESTION 44

Nadav wants to know how accurate estimates were on issues associated with version 2.2.

Which report should he use?
* Time Since Issues Report
* Resolution Time Report
* User Workload Report
* Version Workload Report
* Time Tracking Report
* Single Level Group By Report

QUESTION 45

Which two can project administrators associate with project roles? (Choose two.)
* Security levels
* Application access
* Global permissions
* Groups
* Individual users
* Project permissions

QUESTION 46

A project administrator wants to modify his project screen. The project screen meets all the prerequisites for him to be able to edit it.

Which two actions can he NOT perform? (Choose two.)

* Remove a field
* Rename a tab
* Make a field required
* Rearrange existing fields
* Create a new field
* Move a tab
