VMware 1V0-31.21 Exam

Q10. A company's data center is running out of compute resources (CPU and Memory). As a result, the administration team decided to optimize the CPU and memory value assigned to each virtual machine to save some compute resources.

How can the administrators use vRealize Operations Manager to achieve this goal?

- * Under Workload Optimization, click optimize now, and run the recommended actions.
- * Under Rightsizing, select the oversized virtual machines, and click resize.
- * Under Recommended Actions, check the alerts, and apply the suggested fix.
- * Under Reclaim, select the snapshots shown, and click delete.

Q11. Which two configuration steps must an operator take in vRealize Operations Manager to run actions against VMware vCenter Server resources (Choose two.)

- * Enable Operational Actions on the vCenter Cloud account.
- * Configure a vRealize Automation cloud account.
- * Ensure the vCenter User configured in the cloud account has appropriate permissions.
- * Install the SDDC Management solution.
- * Configure the Management Pack for vRealize Orchestrator.

Q12. Why would the health status of an environment be missing in vRealize Suite Lifecycle Manager (vRSLCM)?

- * Identity Manager is not deployed in the environment.
- * vRealize Log Insight is not deployed in the environment.
- * The SDDC Management Health solution pack is not configured in vRealize Operations Manager.
- * The vRSLCM Management solution pack is not configured in vRealize Operations Manager.

Q13. An administrator wants to further explore guest-level system details for an object that is being investigated in vRealize Operations troubleshooting Workbench.

Which tab should the administrator visit to get the required details?

- * Metrics
- * Alerts
- * Logs
- * Events

Q14. Which component provides a modern workflow automation platform which can be used by companies to automate hardware and software systems throughout their IT infrastructure.

- * Cloud Assembly
- * vRealize Orchestration
- * CloudHealth
- * vRealize Operations

Q15. An operator has been tasked with using vRealize Operations to determine whether sufficient capacity exists within a production vSAN Cluster to add another 100 workloads.

Which two actions should be taken to complete this task? (Choose two.)

- * Create a new Add VMs Scenario using the Workload Planning: Hyperconverged and VMC on AWS option.
- * Create a new Add VMs Scenario using the Workload Planning: Traditional option.
- * Select Plan from the Quick Start Page.
- * Select Assess Capacity from the Quick Start Page.
- * Select Rightsize from the Quick Start Page.

Q16. Which tool in the Cloud Management solution can be used to create dashboards based on the logs generated by vRealize Automation?

- * vRealize Orchestrator
- * vRealize Network Insight
- * vRealize Operations Manager
- * vRealize Log Insight

Q17. An operator has been requested to extract the log events related to an error that has occurred. The request details the fact that log events before and after the time the error occurred also need to be included.

Which action should be taken?

- * Select **View Event In Context** on the event.
- * Define a new Alert Query that matches the event.
- * Use the **Event Trends** tab to analyse the event.
- * Enable Dynamic Field Extraction and repeat the search.

Q18. An administrator is troubleshooting an ESXi host issue and would like to look at metrics that have breached the usual behavior.

Which area of the potential evidence dashboard should be used?

- * Selected Scope
- * Events
- * Anomalous Metrics
- * Property Changes

Q19. An administrator needs to provide a support team access to live data from within vRealize Operations to troubleshoot an on-going application performance issue.

Which actions should the administrator take to help the support team?

- * Create an Alert Definition, and configure an outbound notification.
- * Create a Report, and configure a daily schedule.
- * Create a Dashboard, and configure dashboard sharing.
- * Create a Capacity Scenario, and automatically share the capacity remaining results.

Q20. An administrator has been tasked with onboarding a new public cloud vendor into vRealize Automation so a project can deploy resources to the public cloud.

Which step should the administrator take first?

- * Run on Onboarding Plan.
- * Add a new Cloud Account.

- * Create a new Integration.
- * Configure a new Cloud Zone.

Q21. Which tool can an administrator use to present infrastructure costs by automatically delivering monthly reports by email?

- * vRealize Log Insight
- * vRealize Operations Manager
- * vRealize Suite Lifecycle Manager
- * vRealize Network Insight

Q22. Which two roles does vRealize Operations Manager provide? (Choose two.)

- * Breach Monitoring
- * Performance Monitoring
- * Network Flow Monitoring
- * Application Monitoring
- * Log Monitoring

Q23. Which two vRealize Suite components can an administrator use to help troubleshoot and resolve issues with an existing deployment of vRealize Automation? (Choose two.)

- * vRealize Operations
- * Workspace ONE Access
- * vRealize Suite Subscription Manager
- * vRealize Log Insight
- * vRealize Orchestrator

Q24. An administrator has re-logged on to vRealize Operations Manager and would like to continue reviewing an active troubleshooting for a VM in Workbench.

What must the administrator perform to continue the investigation?

- * Sessions do not persist after the user logs out from vRealize Operations Manager.
- * The administrator must contact VMware support to retrieve the latest session information vRealize Operations Manager.
- * Sessions can be imported based on an export prior to the user logging out of vRealize Operations Manager.
- * Sessions are persisted after the user logs out from vRealize Operations Manager.

Q25. Which benefit is gained through the use of vRealize Suite Lifecycle Manager?

- * Lowers IT spending
- * Reduces the need for vRealize Suite product licenses
- * Simplifies vRealize Suite product upgrades
- * Helps in app migration

Q26. Which two capabilities does vRealize Automation offer? (Choose two.)

- * Multi-cloud automation with governance
- * App-aware intelligent remediation
- * Multi-cloud cost reporting
- * Multi-cloud monitoring with alerting

* Deliver self-service clouds

Q27. Which action must be performed to add information to a vRealize Log Insight dashboard provided by a Content Pack?

- * Clone the Content Pack dashboard, and edit the clone.
- * Rename the Content Pack dashboard, and edit it.
- * Modify the existing Content Pack dashboard.
- * Create a new Content Pack dashboard.

Q28. Which component is mandatory for user authentication in vRealize Automation?

- * Active Directory
- * OpenLDAP
- * Workspace ONE Access
- * vRealize Operations Manager
