Valid Fast2test ECBA Exam PDF Dumps – New ECBA Real Exam Questions

with enough detail to be usable by a particular stakeholder?

- * Validating requirements
- * Verifying requirements
- * Eliciting requirements
- * Specifying requirements

NO.67 Which technique would the business analyst (BA) consider to show the transformation of data?

- * Sequence diagram
- * Data flow diagram
- * Data modelling
- * Flowchart

A data flow diagram illustrates the movement and transformation of data between externals (entities) and processes. The output from one external or process is the input to another. The data flow diagram also illustrates the temporary or permanent repositories (referred to as data stores or terminators) where data is stored within a system or an organization. The data defined should be described in a data dictionary.

NO.68 Which of the following accurately describes a stakeholder's role during future state analysis?

- * A regulator would ensure an envisioned future state can be sufficiently tested and can help set an appropriate level of quality to target.
- * An end user would help determine which business needs to address and sets the business objective that a future state will achieve.
- * A project manager would be directly involved in supporting the operations of the enterprise.
- * A domain subject matter expert would provide insight into current state and potential states.

NO.69 A business analyst (BA) is someone who elicits the actual needs of organizational stakeholders:

- * in any capacity, regardless of job title.
- * in a project team, with an analyst's job title.
- * in a project team, regardless of job title.
- * in any capacity, with an analyst's job title.

They elicit the actual needs of stakeholders, not simply capture their expressed desires. IT Business Analysis activities may be performed in many job titles or organizational roles.
