Note: There are 2 correct answers to this question.

- * RFC calls
- * File templates
- * Core Data Services
- * Staging database

Q48. Which tool do you use to develop your own cloud applications for SAP S/4HANA Cloud?

- * SAP HANA Studio
- * SAPUI5 SDK
- * SAP Cloud SDK
- * SAP ADK

Q49. What other scope items need to be activated in order to be able to set-up and use scope item Intercompany Billing for Service Documents (53Y)?

Note: There are 2 correct answers to this question.

- * Service Order Management and Monitoring (3D2)
- * Intercompany Billing for Cross-Company Cost Accounting Postings (4AN)
- * Procurement for Service Management (3NI)
- * Service Contract Management (3MO)

Q50. What are some responsibilities of a Customer Center of Expertise (CCOE)?

Note: There are 3 correct answers to this question.

- * Serve as a central contact for SAP and manage interactions with the SAP Service Center.
- * Conduct risk-based assessments to determine the value of activating new processes.
- * Ensure the resources necessary for the project’s success are available.
- * Reduce the total cost of ownership for IT.
- * Determine KPIs that will support a continuous improvement mindset.

Q51. You defined a service contract in SAP S/4HANA Cloud.

What is the effect of this service contract on service order creation?

Note: There are 2 correct answers to this question.

- * Customer-specific price agreements are copied from the service contract to the service order, when creating a service order referencing the service contract.
- * Service orders need to be created via an application programming interface (API) in which the service contract is referenced.
- * The service contract contains a detailed description of all services provided, but customer-specific price agreements need to be maintained in every service order.
- * For service orders, automatic service contract determination is available whenever a user creates a new service order for the customer for which the contract was created.

Q52. What is the key characteristic of the process for a service quotation where the service quotation type Standard Service Quotation is used?

- * The total quotation amount is calculated based on the time and material information entered in the quotation.
- * The total capacity requirements are calculated based on the time and material information entered in the quotation.
- * The total available to promise (ATP) quantity is calculated based on the quantities entered for all quotation items.
- * The total quotation amount is calculated based on the fixed price that is entered in the quotation.

Q53. What are some of the main advantages of using the scope item Service Order Processing with SAP Field Service Management (49X)?

Note: There are 2 correct answers to this question.

- * A seamless, fast and flexible delivery of field services by using SAP S/4HANA Cloud to support a service technician
- * A more efficient billing process by using SAP Field Service Management to support a billing clerk out in the field
- * A seamless, fast and flexible delivery of field services by using SAP Field Service Management to support a service technician
- * Automatic status updates in the service order out of SAP Field Service Management

Q54. When a customer has a cloud-centric landscape, which technologies should you use to integrate SAP S/4HANA Cloud with another SAP Cloud solution?

Note: There are 2 correct answers to this question.

- * SAP Cloud Connector
- * Predelivered APIs
- * SAP Process Orchestration
- * SAP Integration Suite

Q55. You are working in an SAP S/4HANA Cloud system where scope item In-House Repair (3XK) has been activated.

What is the purpose of using the Perform Prechecks app?

- * Before starting the actual repair process, you can perform a predefined set of preliminary work steps like disassembly.
- * Before starting the actual repair process, you can check whether enough capacity is available to start the repair process.
- * You can check whether all customer-related prerequisites for a repair process have been fulfilled like the existence of a (repair) contract.
- * You can decide for each repair object whether it needs repairing or should be sent back to the customer.

Q56. What activities are applied to the entire system and cannot be changed after confirmation in SAP Central Business Configuration?

Note: There are 2 correct answers to this question.

- * Scoping

- * Group currency
- * Fiscal year variant
- * Configuration activities

Q57. What are some of the key characteristics of using a fixed-price service bundle in a service order?

Note: There are 3 correct answers to this question.

- * If the service bundle contains a service part and the item is released, the system automatically creates a purchase requisition for the service part.
- * You can manually change the price of the service bundle using condition type PPRO.
- * You can enter a product that represents a service bundle as a sub-item in another service bundle (nested service bundles).
- * Pricing for the sub-items belonging to a service bundle is ignored.
- * The account assignment object for the main item is inherited in the sub-items.

Q58. You need to procure a spare part from an external party.

When does the SAP S/4HANA Cloud system generate a purchase requisition for the spare part?

- * A purchase requisition is generated automatically once the service order line item for the spare part is output and sent to the supplier.
- * A purchase requisition is generated automatically once the service order line item for the spare part is released and saved.
- * A purchase requisition is generated automatically once a service contract item has been created for the spare part.
- * A purchase requisition can only be generated automatically using a material requirements planning (MRP) run.
