

[Feb-2023 SAP Certified Application Associate C_TS422_1909 Exam Practice Test Questions Dumps Bundle! [Q48-Q68]

[Feb-2023] SAP Certified Application Associate C_TS422_1909 Exam Practice Test Questions Dumps Bundle!
2023 Updated C_TS422_1909 PDF for the C_TS422_1909 Tests Free Updated Today!

Q48. When the goods receipt for a finished product is posted during confirmation on a manufacturing environment, which of the following actions are also performed by default?

There are 2 correct answers to this question.

Response:

- * Archiving of backflush documents
- * Posting of production costs to cost collector
- * Staging of components for the next order in the sequence
- * Reduction of the capacity requirements

Q49. What does a line hierarchy in repetitive manufacturing represent?

- * A production line with a parallel sequence in the routing
- * A production line with an alternative sequence in the routing
- * A production line with prioritized alternative work centers
- * A production line with more than one work center

Q50. In your plant, MRP is activated. Which options do you have to exclude a material from the MRP run? Note:

There are 2 correct answers to this question.

- * Use a specific material status.
- * Use a specific MRP controller.
- * Use a specific material group
- * Use a specific MRP type.

Q51. Which master data object governs the relationship between supply source and demand source in the Kanban process?

- * Control cycle
- * Rate routing
- * Production supply area
- * Replenishment strategy

Q52. Which of these are layers in SAP Best Practice content?

There are 3 correct answers to this question.

Response:

- * Configuration guides
- * Building blocks
- * Process diagrams
- * Solution packages
- * Scope items

Q53. Why would you use phantom assemblies? Note: There are 3 correct answers to this question.

- * To make the assignment of components easier
- * To simplify the structure of bills of material
- * To reduce the number of changes required in bills of material
- * To increase the number of planning levels
- * To reduce the number of material masters

Q54. What are the possible results of a production planning run in Advanced Planning (PP/OS)? Note: There are 3 correct answers to this question.

- * Stock transport order
- * Production order
- * Scheduling agreement schedule line
- * Purchase requisition
- * Planned order

Q55. When do you use variant bills of materials (BOMB)?

- * When multiple material is have similar BOMB
- * When a material has multiple BOMB
- * When multiple material also have the same BOM

* When a material has a configurable BOM

Q56. What capabilities does SAP S/4HANA embedded analytics provide?

There are 2 correct answers to this question.

Response:

- * Strategic analysis
- * Automatic update of story boards
- * Comparison of current data with historical data to identify trends
- * Real time decision support

Q57. The production plan is being disrupted by last minute demands that are entered in the system. Which is the most efficient way to handle last minute demands and protect the current production plan?

There are 2 correct answers to this question.

Response:

- * In the material master record, set MRP type to P1 and a planning time fence on the replenishment lead time of the material
- * In the stock requirements list, set a manual firming fence for a date based on the replenishment lead time of the material
- * In the material master record, set MRP type to P4 and a planning time fence on the replenishment lead time of the material
- * Manually firm all planned orders for materials within the replenishment lead time of the material

Q58. What is the difference between co-products and by-products?

- * Only co-products can be manufactured in isolation from the main product.
- * Only by-products have a zero inventory valuation.
- * Only co-products are identified by a special item category in the bill of material (BOM).
- * Only co-products appear in the process or production order settlement rule.

Q59. On which of the following levels can you influence the availability check for the components of production orders?

There are 2 correct answers to this question.

Response:

- * Material master
- * Production order type
- * Production controller
- * MRP controller

Q60. Your customer complains about incorrect duration for production order operations. What time elements could cause the issue?

There are 3 correct answers to this question.

Response:

- * Processing time
- * Move time
- * Queue time
- * Floating time
- * Tear down time

Q61. Which of the following is an advantage of MRP Live and NOT available in classical MRP?

Response:

- * MRP Live can create production orders automatically
- * MRP Live can plan materials with recursive BOMs
- * MRP Live can propose alternative solutions
- * MRP Live can priorities demand from sales orders

Q62. If the stock level drops below the reorder stock in reorder point planning, what is the system logic to trigger procurement?

- * Fill up to the maximum stock level
- * Fill up to the reorder stock level
- * Fill up based on the lot size procedure
- * Fill up to the safety stock level

Q63. A resource was created in SAP S/4HANA PP/DS through the internal CIF integration and named

“W1904_1000_001”. What does the suffix 001 in the resource name represent?

Please choose the correct answer.

Response:

- * Work center category
- * Available capacity version
- * Capacity category
- * Number of individual capacities

Q64. Your production planners must execute planning only for specific resources. How can you achieve this in Advanced Planning (PP”/OS)?

- * Use a propagation range.
- * Use a planning group.
- * Use a resource group.
- * Use a heuristic.

Q65. You are working with planning strategy 40 (Planning-with-final assembly). When does consumption of planned independent requirements take place?

- * When you create a sales order
- * When you deliver a sales order
- * When the MRP results are saved
- * When you create a planned order

Q66. What is the equivalent in SAP S/4HANA of the Production Data Structure in PP/DS?

There are 3 correct answers to this question.

Response:

- * Routing
- * Bill of Material
- * Engineering Change Record
- * Production Version

Q67. You have maintained the parameters for simple discontinuation the material master of a component. Which business process will be affected if the available stock is zero and the discontinuation date is in the past?

- * Back flushing
- * Material requirements planning
- * Production order release
- * Kanban

Q68. A warehouse manager likes to streamline the goods receipt (GR) process for production orders. Where can you enable the automatic GR?

There are 2 correct answers to this question.

Response:

- * Operation control key
- * Scheduling margin key
- * Production scheduling profile
- * Confirmation profile

SAP C_TS422_1909 Certification Exam Topics:

Topic Areas Topic Details, Courses, Books **Demand Management in SAP S/4HANA < 8%** Explain and compare the different production methods in make-to-order, make-to-stock, and assembly planning. TS421 (SAP S/4HANA 1909) TS422 (SAP S/4HANA 1909) **Capacity Planning in SAP S/4HANA 8% - 12%** Outline best practices for using SAP S/4HANA, describe the SAP HANA database concept and new user experience with SAP Fiori, outline the capabilities of embedded analytics. TS421 (SAP S/4HANA 1909) TS422 (SAP S/4HANA 1909) **Advanced Planning in SAP S/4HANA > 12%** Outline the basics and master data of advanced planning, explain tools (alert monitor, detailed scheduling planning board) and advanced planning and detailed scheduling processes, explain planning evaluation concepts TS421 (SAP S/4HANA 1909) TS422 (SAP S/4HANA 1909) **Master Data in SAP S/4HANA > 12%** Identify and explain production relevant master data, including, but not limited to: bill of material, routing and production version. TS421 (SAP S/4HANA 1909) TS422 (SAP S/4HANA 1909) **Introduction to SAP S/4HANA Supply Chain Planning < 8%** Outline both motivation and background of SAP S/4HANA, describe its main components, the lines of business, and the SAP User Experience strategy. TS421 (SAP S/4HANA 1909) TS422 (SAP S/4HANA 1909) **Production Orders in SAP S/4HANA > 12%** Determine BOM item category, describe order status management and set user statuses, configure availability check for components, trigger routing selection, set up an order type, apply material staging and confirmation. TS421 (SAP S/4HANA 1909) TS422 (SAP S/4HANA 1909)
