You assign View on Demand access to the universes.

For which additional object types must you set permissions?

Note: There are 3 correct answers to this question.

- \* Application
- \* Category
- \* Event
- \* Connection
- \* Folder

**NO.46** You want to clone an existing server within the Central Management Console (CMC). Which of the following checks are required before performing the clone? Note: There are 2 correct Answers to this question.

- \* The target machine for the cloned server has the required binaries for the BI platform server installed.
- \* There are no other users logged onto the system.
- \* The server to be cloned is stopped or disabled.
- \* All machines in your deployment have the same version of BI platform.

**NO.47** Where is the configuration information for processing servers stored?

- \* Input File Repository Server
- \* System database
- \* Bootstrap file
- \* Win32\_x86 directory

**NO.48** What steps are recommended for sizing a deployment? Note: There are 3 correct Answers to this question.

- \* Calculate SAPS value.
- \* Determine if BI virtualization (for example, VMware) is used.
- \* Utilize the Quick Sizer.
- \* Determine the number of active concurrent users.
- \* Run the System Configuration Wizard.

**NO.49** You schedule a publication that distributes a Web Intelligence report to an FTP destination. On which server do you define the details (hostname, port, credentials, and path) for the FTP location?

- \* Adaptive Processing Server
- \* Adaptive Job Server
- \* Web Intelligence Processing Server
- \* Central Management Server

**NO.50** A user attempts to open an instance of a report from the History window of the BI Launchpad and receives a File not Found error. How can you identify the missing file?

- \* Run the Repository Diagnostic Tool.
- \* Run and review the Landscape Inspection report.
- \* Check the log in the Data Federation Administration Tool.
- \* Reschedule the report to the same destination.

**NO.51** You want to share a Web Intelligence document automatically to SAP Analytics Cloud. What are some of the required tasks?

Note: There are 3 correct Answers to this question.

- \* Enable the BI platform to push BI assets to SAP Analytics Catalog.
- \* Install SAP Lumira server add-on.
- \* Create a share on SAP Analytics Cloud.
- \* Allow the BI platform user to push BI assets to SAP Analytics Hub.

**NO.52** There are two locations where you can make modifications to your Web applications; the Warfiles directory and the Tomcat directory. Which sub-directory should you use to modify the Web property files?

- \* Admin
- \* Custom
- \* User
- \* Default

**NO.53** From which server does the Crystal Reports Cache Server request pages?

- \* Report Application Server
- \* Crystal Reports Processing Server
- \* Input File Repository Server

- \* Adaptive Processing Server

**NO.54** Which tool can you use to find the database type of the Auditing Data Store?

- \* Upgrade Management Tool
- \* Central Configuration Manager
- \* Repository Diagnostic Tool
- \* Central Management Console

**NO.55** What is the correct procedure for determining the effective rights a user has to an object?

- \* Navigate to the object and invoke the Permissions Explorer.
- \* Run a Security Query for a group to which the user belongs.
- \* Run a Relationship Query for the user and object together.
- \* Navigate to the user in the Users & Groups area, then click the Manage User Security button.

Note: There are 3 correct Answers to this question.

- \* Folders
- \* Personal Folders
- \* Inboxes
- \* Instance Manager
- \* Categories

**NO.57** Which server processes dynamic recipient lists for publications?

- \* Crystal Reports Processing Server
- \* Report Application Server
- \* Output File Repository Server
- \* Adaptive Processing Server

**NO.58** Your report has more records than the value set for Database Records Read When Previewing or Refreshing; on the Crystal Reports Processing Server.

What happens when you refresh the report from the BI launch pad?

- \* The report returns partial results without a warning message.
- \* A user is prompted to edit the report.
- \* The report returns partial results with a warning message.
- \* An error message is displayed.

**NO.59** You want to access BI platform content from SAP Analytics Cloud. Which of the following options are supported? Note: There are 2 correct Answers to this question.

- \* Workflow Assistant
- \* SAP Analytics Hub
- \* Live Data Connection
- \* SAP Analytics Catalog

**NO.60** Which of the following rights are granted on the predefined access level Schedule;?

Note: There are 3 correct answers to this question.

- \* Delete instances that the user owns.
- \* View document instances.

- \* Refresh the report's data.
- \* Modify the rights users have to objects.
- \* Copy objects to another folder.

**NO.61** You want to merge data in SAP BI Platform and use it as a source for an SAP Analytics Cloud model.

Which types of SAP BI Platform objects can you use? Note: There are 2 correct Answers to this question.

- \* Publication
- \* Web Intelligence
- \* Universe
- \* Profile

**NO.62** You have scheduled an object to run daily based upon a file event. The file event occurs between 02:15 and 03:45 each morning. How do you ensure the object runs every day?

- \* Delete the file that triggers the event before 02:15.
- \* Set the Cleanup Interval property on the Event Server to at least 90 minutes.
- \* Set Recurrence in the schedule to Daily after 03:45.
- \* Select the file event in the 'Events to trigger upon completion' area of the schedule for the object.

**NO.63** How does the system behave if you have an Idle Connection Timeout setting on the Crystal Reports Cache Server that differs from the setting on the Crystal Reports Processing Server?

- \* If the setting on the Cache Server is higher than on the Processing Server, this will cause excessive consumption of disk space.
- \* If the setting on the Cache Server is lower than on the Processing Server, a user request could be closed prematurely.
- \* If the setting on the Cache Server is higher than on the Processing Server, this could cause a memory overflow error.
- \* If the setting on the Cache Server is lower than on the Processing Server, the data source connection could be closed prematurely.

**NO.64** How can you reduce system downtime during the installation of updates?

- \* Perform phase-wise installation.
- \* Schedule silent install to occur outside business hours.
- \* Update only one host in the cluster at a time.
- \* Use WDeploy to update Web applications.

**NO.65** Which of the following is responsible for controlling personalization within SAP BusinessObjects publications?

- \* Access control entries
- \* Access levels
- \* User groups
- \* Profiles

**NO.66** Which server manages authentication?

- \* Event Server
- \* Explorer Master Server
- \* Central Management Server
- \* Input File Repository Server

**NO.67** What improvements can clustering offer in terms of system capacity and performance? Note: There are

3 correct Answers to this question.

- \* Load balancing and fault tolerance
- \* Reduced latency between CMS services and the CMS database
- \* Ad-hoc report viewing capacity

- \* Querying of system database
- \* Scheduled reporting capacity

**NO.68** Which of the following servers could have a 'passive' role?

- \* Crystal Reports Cache Server
- \* Adaptive Job Server
- \* Output File Repository Server
- \* Central Management Server

**NO.69** A schedule request for a Crystal report is sent to the Central Management Server (CMS).

Which task does the CMS perform next?

- \* Assign the request to a job server.
- \* Add a record with the schedule information to the system database.
- \* Request the report from the Input File Repository Server.
- \* Send the report instance to the Output File Repository Server.
