* Column:<column demandpopin=”true” maxscreenwidth=”mobile”></column>
* Column:<column demandpopin=”true” maxscreenwidth=”mobile”
popindisplay=”Inline”x/column>
* Column:<column demandpopin=”true” minscreenwidth=”tablet”x/column>
* Column:<column demandpopin=”true” minscreenwidth=”tablet”
popindisplay=”Inline”x/column>

NO.52 In the code on the screenshot, what are the absolute paths of the property that retrieves the City value for the company Acme Inc.? _ Note: There are 2 correct answers to this question.

```
1    var data = {
2              regions: [
3                     {
4                            name: "Americas",
5                            companies : [
6    |                              {
7                                      name : "Acme Inc.",
8                                      city: "Belmont",
9                              }
10
11                                     name : "Beam Hdg.",
12                                     city: "Hancock"
13                              }
14                              ]
15                     }
16              ]
17       };
18
19   var oModel = new sap.ui.model.json.JSONModel();
20   oModel.setData(data);
21   oModel.getProperty("<Absolute Path>")
```

* /regions/companies/O/city
* /regions/1/companies/l/city
* /regions/0/companies/O/city
* /region[0]/companies[O]/city

NO.53 In the data in the screenshot, you want to display the List of Companies in the Americas region.Which binding option do you use for the X, Y, and Z values in the view?

```
1    View:
2        <List id="myList"  items="{X}"
3           headerText="Companies" >
4           <DisplayListItem label="{Y}" value="{Z}" />
5        </List>
6
7    Data:
8        var data = {
9               regions: [
10                     {
11                          name: "Americas",
12                          companies : [
13                                 {
14                                     name : "Acme Inc.",
15                                     city: "Belmont"
16                                 },
17                                 {
18                                     name : "Beam Hdg.",
19                                     city: "Hancock"
20                                 }
21                                 ]
22                     }
23               ]
24          };
25
```

* X: /regions/0/companies Y: companies/0/name Z: companies/0/city
* X: /regions/companies Y: companies/name Z: companies/city
* X: /regions/companies Y: name Z: city
* X: /regions/0/companies Y: name Z: city

NO.54 Your customer extends an SAP Fiori app with View Replacement.Which activities do you perform?Note:

There are 2 correct Answers to this question.

* Verify that adding custom content in the Extension Points is NOT sufficient.
* Create an SAPUI5 control that replaces the original control.
* Create an SAPUI5 view that replaces the complete view.
* Identify a specific SAPUI5 control to be replaced.

NO.55 Which HTTP request methods does the SAP Gateway server use to compute and return a new eTag in a response header?Note: There are 2 correct Answers to this question.
* PUT
* GET
* POST
* DELETE

NO.56 How can you extend an SAP Fiori app?

Note: There are 3 correct answers to this question.
* Modify the runtime libraries that are to be loaded
* Modify the properties of the view control
* Modify the data model to merge data at runtime.
* Enable merging of the standard and the custom controller at runtime.
* Add custom view content in a predefined extension point.

NO.57 Which of the following floorplans also have a standard SAP Fiori Elements implementation available as a part of SAP Fiori 2.0? Note: There are 3 correct answers to this question.
* Analytical List Page
* Wizard
* Initial Page
* Overview Page
* List Report

NO.58 You need to bind data from a model to an SAPUI5 view control.

Which of the following modes are valid?

Note: There are 3 correct answers to this question.
* One-time binding
* Three-way binding
* Resource-model binding
* Two-way binding
* One-way binding

NO.59 What activity does the QUnit Stub functionality perform?
* Supplies parameters for method calls.
* Provides parameters and return values for method calls.
* Retuns values for method calls
* Verifies that expected methods are called correctly.

NO.60 Which tool can you use to generate SAPUI5 coding that is based on prototypes?
* SAP Build
* UI Theme Designer
* SAP Business Application Studio

* Adobe Flash

NO.61 In a SAP Fiori hub deployment, where is the SAPUI5 application code stored for a transactional app?
* SAP Back-End Server (BES)
* SAP Front-End Server (FES)
* SAP HANA XS Engine
* SAP Web Dispatcher

NO.62 In the source code below, which of the following locations must reference the extension point?

```
1  <core:view xmlns:core="sap.ui.core" xmlns:form="sap.ui.core.mvc" xmlns="sap.m"
2      controllerName="appextension.EmployeeData" xmlns:html="http://www.w3.org/1999/xhtml">
3      <page title="Title">
4          <content>
5              <label text="First name:">
6              <input>
7              <core:extensionpoint ... ...ddleName">
8                  <label ...ass name:">
9                      <input>
10                     <button text="Get Info" press="doGetInfo"></button>
11                 </label>
12             </core:extensionpoint>
13             </label>
14         </content>
15     </page>
16 </core:view>
```

* Neo-app.json
* Componente.js
* EmployeData.view.xml
* EmployeData.controller.js

NO.63 What are Smart Controls?
* The predecessor of Smart Templates
* SAPUI5 controls that can be rendered dynamically according to OData service annotations
* Basic SAPUI5 controls recommended for standalone usage
* Application templates for SAPUI5 applications to optimize development

NO.64 Your customer requires that the SAPUI5 design of all apps matches their corporate theme.Which of the following actions do you perform?Note: There are 3 correct Answers to this question.
* Create a model using the SAP Business Application Studio implementing the theme.
* Reference the relevant artifacts in the bootstrap of the app.
* Create a module using the Web IDE implementing the theme.
* Create a theme using the Theme Designer implementing the theme.
* Create a css file using the SAP Business Application Studio implementing the theme.

NO.65 What type of navigation is used in SAP Fiori Launchpad applications?
* Action-based navigation
* Scope-based navigation
* Target-based navigation

NO.66 Which methods can you use to bind data to the controls in SAPUI5?Note: There are 3 correct Answers to this question.

* Element
* Structure
* Property
* Combination
* Aggregation

NO.67 What activity does the QUnit Stub functionality perform?

* Supplies parameters for method calls.
* Verifies that expected methods are called correctly.
* Provides parameters and return values for method calls.
* Returns values for method calls.

NO.68 Which of the following tile types can use an OData service to set the title properties?

* Semi-dynamic
* Dynamic
* Static
