

## DEA-5TT2 Exam Preparation Material with New DEA-5TT2 Dumps Questions [Q10-Q25]

DEA-5TT2 Exam Preparation Material with New DEA-5TT2 Dumps Questions  
DEA-5TT2 2023 Training With 62 QA's

EMC DEA-5TT2 certification exam is a vendor-neutral certification, which means that it is not tied to any specific networking technology or solution. This makes it an ideal certification for IT professionals who work in heterogeneous IT environments, where different networking technologies and solutions are used. Associate - Networking Exam certification exam is designed to test the candidate's knowledge and skills in various networking technologies, including LANs, WANs, wireless networks, and network security.

### NEW QUESTION 10

A network administrator is troubleshooting an OSPF routing issue. There are two paths to a destination network from one switch. In addition, one path is comprised of four 1 Gb links. The other path is comprised of two 1 Gb and two 100 Mb links. The administrator ran several trace routes and notices that the packets are swapping back and forth between the two paths.

Which corrective action must be taken on the switch infrastructure to correct this issue?

- \* Manually specify the OSPF Router ID on each switch within the path.
- \* Break the paths into multiple OSPF areas.
- \* Change the reference speed used by OSPF in cost calculations on all switches within the path.
- \* Switch all routing protocols to RIPv2.

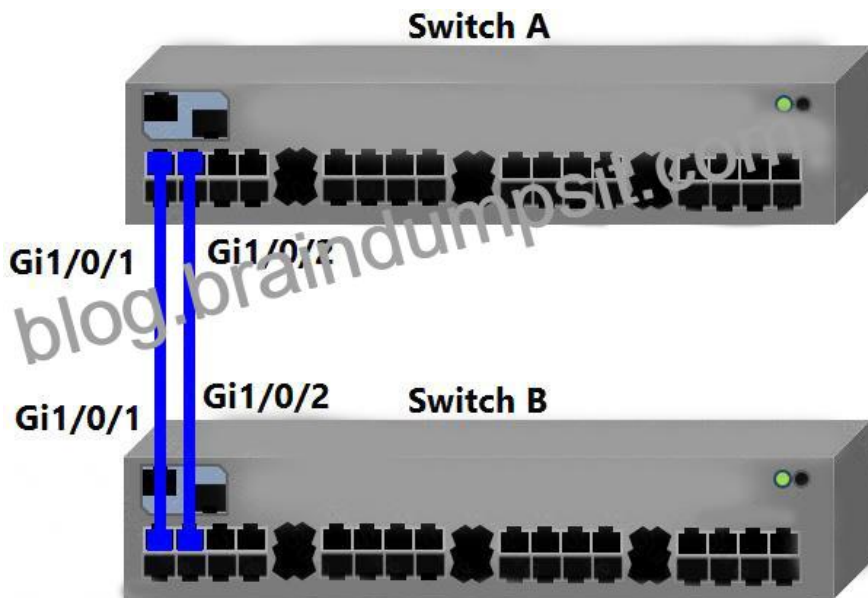

### NEW QUESTION 11

What is the Organizationally Unique Identifier (OUI) in the MAC address 00:C4:4F:23:AF:4A?

- \* 00:C4:4F
- \* 00:C4:4F:23
- \* 23:AF:4A
- \* 4F:23:AF:4A

### NEW QUESTION 12

Refer to the exhibit.

Switch A and Switch B are connected to each other. Both switches use interfaces Gi1/0/1 and Gi1/0/2. Switch A has a Spanning Tree priority of 8192 and Switch B has the default priority. Which interface becomes the root port?

- \* Switch A Gi1/0/1
- \* Switch A Gi1/0/2
- \* Switch B Gi1/0/1
- \* Switch B Gi1/0/2

### NEW QUESTION 13

A network administrator created three VLANs on an Ethernet switch. How many broadcast domains are created by the switch?

- \* 1
- \* 2
- \* 3
- \* 4

#### NEW QUESTION 14

Which IPv4 address is in the same network as the IP address 182.15.24.40/23 and assignable to a host device?

- \* 182.15.23.224
- \* 182.15.25.0
- \* 182.15.25.255
- \* 182.15.26.10

#### NEW QUESTION 15

Which port and protocol is used by NTP to communicate?

- \* TCP port 123 for both the source and destination
- \* TCP port 123 for the source and TCP port 80 for the destination
- \* UDP port 123 for both the source and destination
- \* UDP port 123 for the source and TCP port 80 for the destination

#### NEW QUESTION 16

On which OSI layers do standard ACL filters operate?

- \* 2 and 3
- \* 2 and 7
- \* 3 and 4
- \* 4 and 7

#### NEW QUESTION 17

What accurately describes the Simple Network Time Protocol (SNTP)?

- \* Time synchronization algorithms are more complex and account for clock drift.
- \* Client makes sudden changes in time to keep synchronized.
- \* Client synchronizes among a set of distributed time servers.
- \* Implemented on a Dell EMC Network OS 9 and OS 10.

#### NEW QUESTION 18

When configuring a switch, which CLI mode only supports limited show commands?

- \* EXEC
- \* Maintenance
- \* Configuration
- \* EXEC Privilege

#### NEW QUESTION 19

In IPv4, what is the proper conversion from binary to decimal for the number 11010010?

- \* 202
- \* 210
- \* 226
- \* 258

#### NEW QUESTION 20

Which fields are mandatory TLVs in a LLDP PDU frame?

- \* System Capabilities and Management Address
- \* Chassis ID, Port ID, and Time-to-Live
- \* IP Address, Default Gateway, and DNS
- \* Port Description, System Name, and System Description

#### **NEW QUESTION 21**

Which topology is considered a best practice when stacking switches?

- \* Ring
- \* Cascade
- \* Serial
- \* Daisy-chain

#### **NEW QUESTION 22**

In which Spanning Tree protocol state does a port record MAC addresses but does not forward the data?

- \* Forwarding
- \* Blocking
- \* Learning
- \* Listening

#### **NEW QUESTION 23**

What accurately describes the Network Time Protocol (NTP)?

- \* Implemented on a Dell EMC Network OS 6.
- \* Time synchronization algorithms do not account for clock drift.
- \* Client synchronizes among a set of distributed time servers.
- \* Client makes sudden changes in time to keep synchronized.

#### **NEW QUESTION 24**

Which IP address is in the Class B range?

- \* 100.100.90.87
- \* 126.16.20.48
- \* 191.56.44.200
- \* 192.15.48.130

#### **NEW QUESTION 25**

Which criteria is used to define an extended MAC ACL filter?

- \* Destination MAC address and Ethernet frame type
- \* Ethernet frame type and frame size
- \* Destination TCP port number and source MAC address
- \* Source and destination MAC addresses
