Regular Free Updates C-SEN-2205 Dumps Real Exam Questions Test Engine Oct 19, 2023 Practice Test Questions Verified Answers As Experienced in the Actual Test!

SAP Certified Application Associate - SAP Enable Now (C-SEN-2205) exam is designed for professionals who want to validate their skills and knowledge in SAP Enable Now. SAP Enable Now is a powerful software that helps organizations create, deliver, and manage effective training content. Certified Application Associate - SAP Enable Now certification exam tests candidates on their understanding of SAP Enable Now features and functionalities, including how to create and manage projects, design and develop content, and deliver and track training.

NEW QUESTION 29

Your customer wants to store all SAP Enable Now documentation within SAP Solution Manager. What do you tell the customer?

- * The integration is possible with any version of SAP Solution Manager on both client side and server side.
- * The integration is done from within Manager via scheduled synchronization.
- * The integration is possible between Producer and SAP Solution Manager 7.2 but will only provide deep links to the

documentations.

NEW QUESTION 30

According to SAP best practice, why should you use the Web Assistant Editor? Note: There are 2 correct answers to this question.

- * To translate content
- * To perform basic text editing of tiles and bubbles
- * To create context help and guided tours
- * To maintain system meta-information

NEW QUESTION 31

How can you provide a deeplink to published content? Note: There are 2 correct answers to this question.

- * By changing the view in the Manager from Without Tag to Published and copying the Start Link from selected content
- * By defining the web server's URL as a start link prefix and copying the published start link property
- * By selecting content in the Project Explorer of the Manager and copying the URL in the address bar of the browser
- * By activating Show UID in the Producers' View menu and copying the UIDs as a deeplink for the published content

NEW QUESTION 32

Your customer has created a content structure that includes different languages, processes, roles and courses. The customer wants to grant access to the content via Library on a web server but does not know how to publish it as a single deployment without redundancies. Which solutions would you suggest? Note: There are 3 correct answers to this question.

- * Provide pre-filtered links to show only language-related content.
- * Distribute deep links to sub-trees of the structure for different target groups.
- * Create and provide filters for the library before deploying the complete structure.
- * Use the Included Dependent Objects option in the publishing rule wizard.
- * Define Manager tags per target group and tag the content accordingly.

NEW QUESTION 33

When you use custom scripts, what must you consider? Note: There are 2 correct answers to this question.

- * Custom scripts are by default NOT error-handled.
- * You must implement custom scripts in the standard macro set.
- * Custom scripts must NOT be published.
- * You must create a backup copy of the entire workarea before you run custom scripts.

NEW QUESTION 34

What is the purpose of recognition and re-recognition validation? Note: There are 3 correct answers to this question.

- * To find out what content types to produce for which target application
- * To sell additional SAP Enable Now components
- * To find out if custom profiles need to be created
- * To set the customer expectations to a realistic level regarding recognition and re-recognition
- * To provide a training plan for authors to avoid authoring limitations

NEW QUESTION 35

You are planning an SAP Enable Now on-premise implementation. What must you do to ensure network security compliance? Note: There are 2 correct answers to this question.

- * Add the Upload Active Content permission to all users.
- * Contact network administrators to confirm that the network security restrictions allow the required MIME types.
- * Use standard ports only.
- * Adapt the password policy of the Manager to the password policy of the customer.

NEW QUESTION 36

Which steps are required to set up a workarea in the Manager? Note: There are 3 correct answers to this question.

- * Define a default workflow.
- * Create or import a Toolbox.
- * Set up workarea permissions using existing roles.
- * Provide customized workarea resources.
- * Set up notification settings according to the workarea.

NEW QUESTION 37

What kind of objects, structures or elements can be referenced? Note: There are 3 correct answers to this question.

- * Media objects
- * Groups
- * Text units
- * Resources
- * Workareas

NEW QUESTION 38

Your customer's IT department does not want to roll out Desktop Assistant. Their concern is that Desktop Assistant is not secure because it collects sensitive user data from the target application. How do you address this concern? Note: There are 2 correct answers to this question.

- * Desktop Assistant reads interface information only from the target application.
- * Information that is read by Desktop Assistant is only handled locally.
- * The collected sensitive user data is only accessible in a permission-based report.
- * The collected data will be anonymized before the data is sent back to the server.

NEW QUESTION 39

How can an end user with standard role Learner get access to assigned courses provided by the Manager? Note: There are 2 correct answers to this question.

- * By accessing the Learner view of the Manager
- * By accessing the Roles view of the Desktop Assistant
- * By using the Start link
- * By using a direct URL that includes the assignment ID of the course

NEW QUESTION 40

You installed the SAP Enable Now Manager on premise on an Apache Tomcat server. What do you do next? Note: There are 2 correct answers to this question.

- * Download and add the additional Java libraries that are needed for Manager, SQL option.
- * Send the Tomcat administrator password to SAP support.
- * Configure the server XML files to match security and performance requirements.
- * Change the values for the memory pool to match performance requirements.

NEW QUESTION 41

What are some deliverables of the strategy and configuration phase? Note: There are 3 correct answers to this question.

- * Authoring guidelines
- * A customized Producer installer
- * A custom application profile
- * An infrastructure diagram
- * A full corporate design customization

NEW QUESTION 42

Which of the following data types are supported in SAP Enable Now? Note: There are 3 correct answers to this question.

- * INTEGER
- * USERNAME
- * HTML
- * TIMESTAMP
- * TEXT

NEW QUESTION 43

A Learning Management System (LMS) does NOT receive any results or scores from the processed SAP Enable Now course. What could be the reason for this issue? Note: There are 2 correct answers to this question.

- * The tracking back end from the playback settings was set to SCORM (automatic).
- * The LMS does not provide an SAP Enable Now interface.
- * The tracking back end from the playback settings was set to Manager.
- * The configuration of the Result Type option does not meet the LMS requirements.

NEW QUESTION 44

What must you do before you update SAP Enable Now on-premise? Note: There are 2 correct answers to this question.

- * Download the SAP Enable Now installers from SAP Service Marketplace.
- * Edit the workarea resources entity.xml files manually.
- * Preview the new version of SAP Enable Now and test the content.
- * Back up the file repository and database.

NEW QUESTION 45

How can you address a pre-filtered view of a structure in a published library?

- * By cloning the structure and deleting the unwanted duplicates
- * By adding the end user filter directly to library.html
- * By activating the author filter and applying it for end users
- * By adding the filter-specific library.txt infix to the URL

NEW QUESTION 46

A customer wants to use Desktop Assistant for a non-SAP target application that is not listed in the Product Availability Matrix (PAM) and asks you whether this is possible. What do you reply?

- * Desktop Assistant can be rolled out for an application, but will support the application context only.
- * Because the application is not listed in the PAM, Desktop Assistant cannot be rolled out for this application.

- * The PAM shows the limitations for SAP applications. Non-SAP applications are supported out-of-the-box.
- * Because the application is not listed in the PAM, it is not officially supported. You must evaluate whether the application will work.
