Practice Examples and Dumps & Tips for 2023 Latest H13-811_V3.0 Valid Tests Dumps [Q209-Q232

Practice Examples and Dumps & Tips for 2023 Latest H13-811_V3.0 Valid Tests Dumps

Latest [Nov 23, 2023] 100% Passing Guarantee - Brilliant H13-811_V3.0 Exam Questions PDF

Huawei H13-811_V3.0 (HCIA-Cloud Service V3.0) Certification Exam is a professional-level certification exam that validates the skills and knowledge required to design, deploy, and manage cloud computing solutions using Huawei technologies. HCIA-Cloud Service V3.0 certification exam is aimed at IT professionals who are responsible for designing and deploying cloud service solutions for their organizations. H13-811_V3.0 exam covers a range of topics, including cloud computing architecture, Huawei FusionCloud solution, network virtualization, cloud storage, and cloud security.

Cloud computing has become an essential part of modern-day businesses. Organizations are increasingly relying on cloud services to store, manage, and process their data. The Huawei H13-811_V3.0 (HCIA-Cloud Service V3.0) certification exam is designed to help professionals gain expertise in cloud service technologies and stay updated with the latest industry trends. H13-811_V3.0 exam covers a wide range of topics, including cloud computing models, cloud service deployment, and cloud service management.

NEW QUESTION 209

The scalable bandwidth supports the setting of three types of scalable bandwidth strategies, which are alarm strategy, timing strategy and periodic strategy.
* True
* mistake

NEW QUESTION 210

Adopt IP During Sec VPN communication, Encryption and decryption verification is carried out on the firewalls at both ends
* True
* False

NEW QUESTION 211

What is the deduction period of API gateway?
* sky
* minute
* Hour
* Second

NEW QUESTION 212

Description of Security Group, Which of the following is wrong? (Single choice)
* The system will create a security group for each user by default, The rule of the default security group is to pass all data packets on the outgoing room, Restricted access in the inbound direction, The elastic cloud servers in the security group can access each other without adding rules.
* Security group is a logical grouping, Provide access policies for mutually trusted elastic cloud servers in the same VPC that have the same family protection requirements.
* After the security group is created, Users can define various access rules in the security group, When the elastic goes to the server to join the group or the whole group, It is protected by these access rules.
* When configuring security group rules, The source and destination addresses can only be set as IP addresses, It cannot be a security group.

NEW QUESTION 213

What are the stages of APT life cycle management?
* Create, publish, authorize, offline
* Create, authorize, publish, offline
* creation, release, flow control, offline

NEW QUESTION 214

Which of the following container exceptions can the Container Security Service monitor?
* High-risk system calls
* Escape vulnerability attack
* Escape file access
* Container abnormal process

NEW QUESTION 215

What are the key features of LAM unified identity authentication?
* Centralized control of users and security credentials
* Centralized control of user access
* User group-based permissions
* Support Huawei customer service agent maintenance operation

NEW QUESTION 216

More than elastic cloud servers cannot use the same RDS database.
* is correct
* mistake

NEW QUESTION 217

When the load balancer uses the seven-layer protocol HTTP/HTTPS, which of the following options is the network traffic path?
* LVS cluster>Nginx cluster>ECS
* Nginx clusterLVS clusterECS
* LVS clusterECS
* Neinx clusterECS

NEW QUESTION 218

cloud dedicated line currently supports manual activation and self-service activation.
* True
* mistake

NEW QUESTION 219

cloud traditional file sharing storage compared, What are the advantages of SFS?
* File Sharing
* High reliability
* Seamless integration
* Simple operation but high cost

NEW QUESTION 220

The elastic scaling service must be used with elastic load balancing.()
* True
* mistake

NEW QUESTION 221

What are the scheduling algorithms for elastic load balancing?
* Weighted polling algorithm
* Source ip algorithm
* Weighted random method
* Weighted least connection

NEW QUESTION 222

The two sites communicate across the Internet, and IP can be deployed on the firewalls at both ends Sec VPN thus protects the mutual access traffic between the two intranets.

* True
* mistake

NEW QUESTION 223

The API gateway service is a booster for the digital transformation of enterprises.

* True
* mistake

NEW QUESTION 224

On the cloud hard disk backup interface, you can delete the backup whose source is “Cloud Server Backup”.

* True
* mistake

NEW QUESTION 225

There is no limit to the size of the exported image.

* True
* mistake

NEW QUESTION 226

The description of the physical leased line created by the partner is the following error?

* One physical leased line for operation can be bound to multiple physical leased lines for tenants
* Partners can purchase and operate physical private lines without an administrator account.
* Partners create leased lines for ordinary users by creating tenant physical leased lines
* Partners can purchase and operate physical dedicated lines

NEW QUESTION 227

The main function of database security service does not include which of the following?

* Anti-reptile
* Database firewall
* Database audit
* Sensitive data discovery and desensitization

NEW QUESTION 228

API Provider and API The identity of the consumer is not fragmented, It can be converted to each other.

* True
* False

NEW QUESTION 229

Cloud Monitoring, What alarm status does Cloud Monitoring currently support?

* Warning

* Back to normal
* Insufficient data
* All of the above

NEW QUESTION 230

Which of the following services does cloud hard disk backup service depend on?
* Cloud hard drive
* Elastic Cloud Server
* Object storage
* Mirroring

NEW QUESTION 231

What does the elastic cloud server use for data storage?
* Elastic scaling
* Mirroring
* Cloud hard drive
* Dedicated cloud

NEW QUESTION 232

What is wrong with the statement about the removal of instances of the scaling group?
* When the number of expected instances of the scaling group is less than the current number of instances, the scaling group will remove redundant instances.
* You can configure the instance removal strategy as needed.
* Instances manually moved in will not follow”Instance removal strategy”Requirement and has the lowest priority when it is removed.
* When the scaling group is moved out of the instance, the balance of the availability zone will not be considered.
