

## C-IBP-2305 Dumps 2023 New SAP C-IBP-2305 Exam Questions [Q41-Q61]

## C-IBP-2305 Dumps 2023 New SAP C-IBP-2305 Exam Questions [Q41-Q61]

C-IBP-2305 Dumps 2023 - New SAP C-IBP-2305 Exam Questions  
Free C-IBP-2305 braindumps download (C-IBP-2305 exam dumps Free Updated)

### SAP C-IBP-2305 Exam Syllabus Topics:

TopicDetailsTopic 1- Optimize the integration scenarios and architecture of your planning solution- Solution Architecture & Data IntegrationTopic 2- Define and view information with user-defined charts and dashboards- Configure and use Planning Operators to automate processes in your planning modelTopic 3- Create and transform forecasts in your planning model- Display, create, copy, edit, check, and activate a planning area

### QUESTION 41

Safety Stock outputs from Multistage Inventory Optimization are sent to which of these processes? Note: There are 2 correct answers to this question.

- \* Decoupling Points determination in SAP IBP for demand-driven replenishment
- \* Supply Heuristics in SAP IBP for sales and operations
- \* Charts creation in SAP Supply Chain Control Tower

- \* Demand Sensing with Gradient Boosting (Full)

#### QUESTION 42

Which of the following approaches could you take to reduce run times of an optimizer?Note: There are 3 correct answers to this question.

- \* Increase the use of incremental lot size beyond the frozen horizon.
- \* Use non-overlapping networks by using subnetwork ID maintained at Location-Products to reduce the size of the problem.
- \* Avoid using telescopic time buckets.
- \* Keep the number of fairshare segments small.
- \* Split into multiple planning areas to support weekly vs. daily planning needs.

#### QUESTION 43

Which functional capabilities are included in SAP IBP for response and supply?Note: There are 2 correct answers to this question.

- \* Gating Factors
- \* Planning with Product Allocations
- \* Analyze Supply Usage
- \* Detailed Production Scheduling

#### QUESTION 44

Which of the following checks for master data and key figures does the Check Mode algorithm trigger?Note:

There are 3 correct answers to this question.

- \* It checks whether the location products specified in the master data are connected by customer sourcing rules within the supply chain network.
- \* It checks whether the location resource specified in the master data forms a cycle in the supply chain network.
- \* It checks whether the sourcing in the Production Source Item Master Data type exists.
- \* It checks whether the heuristic detects cycles formed by nodes (such as location products) in the supply chain network.
- \* It checks whether the required planning level master data exists for a subset of input key figures.

#### QUESTION 45

A time profile is defined with these levels: day, technical week, week, month, quarter, and year. What condition in configuration will allow you to have a different value in the current week, versus all other time buckets?

- \* IF(#{PERIODID4} =#{} ;#{PERIODID4CU} )
- \* IF(#{PERIODID2} =#{} ;#{PERIODID2CU} )
- \* IF(#{PERIODID3} =#{} ;#{PERIODID3CU} )
- \* IF(#{PERIODID5} =#{} ;#{PERIODID5CU} )

#### QUESTION 46

Which of the following are examples of time-independent key figures?Note: There are 2 correct answers to this question.

- \* A special key figure marked as an aggregate key figure (aggregate constraint)
- \* A currency conversion key figure, such as exchange rate
- \* A unit of measure key figure, such as UOM CONVERSION FACTOR
- \* A forecast metric key figure, such FCSTMAPE

#### QUESTION 47

You need to create time periods for the time profile in a planning area. What should you be aware of when running the Create Time Periods application job?

- \* The assigned Planning Area must be active.
- \* This application job can be run for multiple time profiles at once.
- \* In the Parameter Section of the application job, choose the Time Profile ID and Planning Area.
- \* A time profile has to be activated so that the application job can proceed.

#### QUESTION 48

What are some of the prerequisites for configuring a planning area that results in a successful consistency check? Note: There are 2 correct answers to this question.

- \* Configure at least one calculated key figure for the planning area.
- \* Specify a planning horizon in the planning area for each level of the assigned time profile.
- \* Configure at most two input key figures on the same planning level in a key figure calculation.
- \* Assign the compound master data type and its component master data types.

#### QUESTION 49

What are the ways to achieve rolling aggregation with SAP IBP?

- \* Using a local member
- \* Using an appropriate period weight factor
- \* Using a key figure calculation
- \* Using an attribute as a key figure

#### QUESTION 50

Which of the following are features of lag-based snapshots? Note: There are 2 correct answers to this question.

- \* Target key figures for these snapshots must have lag as a root attribute in its base planning level.
- \* The number of lag-based snapshots are limited to nine levels.
- \* Lag-based snapshots are created in the Configuration app for a fixed time range.
- \* Target key figures for these snapshots are exposed to the user in planning views.

#### QUESTION 51

You need to make manual adjustments to your S&OP plan. Which are possible ways of making these changes? Note: There are 2 correct answers to this question.

- \* Using Microsoft Excel planning views
- \* Leveraging the web-based planning capability
- \* Leveraging the functionality of SAP Workzone
- \* Using Driver-Based planning

#### QUESTION 52

You are setting up planning with lot sizes. What are some of the properties of lot sizes that you need to be aware of? Note: There are 2 correct answers to this question.

- \* Lot sizes are applicable for production and handling quantities.
- \* Periodic lot size setting overrides the minimum lot size.
- \* Lot sizes are time-independent master data settings.
- \* Lot sizes are applicable for production and transportation quantities.

### QUESTION 53

You need to define a new logic for a key figure to drive values from the PERPRODCUSTREGION level to the PERPRODCUST level. Which of the following configuration options are possible for this process? Note: There are 2 correct answers to this question.

- \* Splitting the values from aggregated to detailed level, based on the time profile attribute
- \* Splitting the values from aggregated to detailed level, based on a stored split-factor key figure
- \* Splitting the values from aggregated to detailed level using multiplication by the proportions
- \* Splitting the values from detailed to aggregated level by using a copy operator

### QUESTION 54

Which are the mandatory preconditions for an attribute that can be used for saving the segmentation results? Note: There are 2 correct answers to this question.

- \* The Business Meaning of the attribute has been specified.
- \* The attribute should be a non-key attribute of the master data type.
- \* The attribute belongs to a simple or compound master data type.
- \* The attribute should be assigned to all planning levels.

### QUESTION 55

Which of the following are functions of SAP IBP for demand? Note: There are 2 correct answers to this question.

- \* Demand sensing of demand data using predictive analytics tools
- \* Embedded, on-the-fly demand analytics
- \* Detailed statistical analysis of demand data using predictive analytics tools
- \* Consideration of demand-driven analysis for buffer positioning.

### QUESTION 56

How can the SAP IBP scenario modeling functionality support business users in the S&OP planning cycle? Note: There are 2 correct answers to this question.

- \* Simulate heuristics run in Supply Review stage
- \* Simulate statistical forecast at the Demand Review stage
- \* Simulate demand sensing inputs for Supply Review
- \* Model inventory turns based on Target Safety stocks

### QUESTION 57

You need to integrate data from SAP S/4HANA and legacy ERP to SAP IBP. What are the integration tools that you can use with such a setup for data transfer? Note: There are 2 correct answers to this question.

- \* Cloud Identity Authentication Service
- \* Real-time Integration
- \* Cloud Integration for Data Services
- \* Smart Data Integration

### QUESTION 58

Which sourcing methods are required to identify the product flow through the network? Note: There are 3 correct answers to this question.

- \* Sourcing via Costs

- \* Customer Sourcing Rule
- \* Sourcing via Production
- \* Unspecified Sourcing
- \* Sourcing via Demand Prioritization

#### **QUESTION 59**

What are the outputs of the Calculate Target Inventory Components Operator?Note: There are 3 correct answers to this question.

- \* Target Cycle Stock
- \* Recommended Safety Stock
- \* Component Usage
- \* Reorder Point
- \* Target Pipeline Stock

#### **QUESTION 60**

Which constraints are taken into account by the Time-Series-Based Supply Planning Heuristic (Infinite)?Note: There are 3 correct answers to this question.

- \* Transportation lead times
- \* Maximum lot size
- \* Minimum lot size
- \* Adjusted transport receipts
- \* Aggregated constraints

#### **QUESTION 61**

You are implementing SAP IBP to plan for a supply chain that experiences high seasonality.What supply planning operators can be used in your model to plan stock pre-builds?

- \* Finite and infinite heuristics
- \* Supply optimizer and supply heuristics
- \* Supply optimizer only
- \* Finite heuristics only
