- * It avoids the start-stop-start of project delays
- * It is the foundation of the House of Lean

- * It provides the shortest sustainable lead time
- * It ensures delivery of valuable products

NO.48 What is a benefit of capacity allocation?

- * It ensures all value streams in the portfolio are appropriately funded
- * It enables more effective time tracking
- * It ensures different types of backlog items are not compared against one another

NO.49 Which behavior exemplifies servant leadership?

- * Creating an environment of mutual influence
- * Protecting the teams and train from negative reviews
- * Ensuring appropriate justice is served if things go wrong
- * Looking out for the interests of customers and stakeholders

NO.50 What is a common reason why a team is unable to estimate a story?

- * The team does not understand the tasks related to the story
- * The story lacks acceptance criteria
- * The team has no experience in estimating
- * The story does not include a role

NO.51 During Program Increment (PI) Planning, a scrum of scrums occurs just before the draft plan review. The Scrum Master from one team raises an issue that one of the Product Managers just showed up to the planning area with a priority wish list of items. These items do not align with the Feature prioritization. What is the most likely planning anti-pattern causing this sudden impediment?

- * There is strong alignment between business and marketing
- * Planning decisions have been centralized
- * Prioritization by Product Management was performed autonomously not collaboratively
- * There is no social network that Solution development relies on

NO.52 In addition to Innovation and Planning, what else does the IP Iteration provide time for?

- * An estimating guard band
- * An opportunity to integrate and perform end-to-end testing
- * Building in quality and compliance
- * Additional planned work

NO.53 What is an input to the Program Increment Planning process that highlights how Product Management plans to accomplish the Vision?

- * Top ten Features
- * Top 20 Features
- * Business context
- * Program board

- * Incremental product development
- * Adaptive product development
- * Lean product development
- * Iterative product development

NO.55 Which two items should be kept under version control? (Choose two.)

- * Test data
- * Scrum of scrum results
- * Weighted shortest job first outcomes
- * Archived User Stories
- * Configuration Items

NO.56 What is one of the questions the Product Management team must answer in order to create a Vision?

- * Which themes are on the Roadmap
- * How many Features have already been released to the Customer
- * Which problem will the Solution solve

NO.57 Which SAFe Core Competency requires exemplifying the principles and values of lean-agile?

- * Continuous Learning Culture
- * Agile Product Delivery
- * Organizational Agility
- * Lean-Agile Leadership

NO.58 Which statement is true about estimating Features using Story points?

- * More than one team may be involved in the estimation
- * T-shirt sizing is the best way to estimate features
- * Feature estimation is performed solely by Product Managers

NO.59 What are two responsibilities of the Release Train Engineer as chief Scrum Master for the Agile Release Train (ART)?
(Choose two.)

- * Break down Features into Stories
- * Escalate ART impediments
- * Provide the go/no-go decision for large initiatives
- * Analyze Epics in the Portfolio Kanban
- * Facilitate Program Increment (PI) Planning

NO.60 When estimating stories, what is the Scrum Master's key responsibility?

- * Ensure the team gives accurate estimates
- * Ensure everyone on the team participates
- * Provide information about customer needs
- * Limit discussion to manage timeboxes

NO.61 In order to evolve the role of a leader in SAFe, which practices can the Release Train Engineer (RTE) recommend?

- * Provide the RTE with weekly status reports
- * Develop detailed project plans
- * Manage up and across the Enterprise
- * Encourage personal development

NO.62 Which primary role should emphasize lifelong learning?

- * Lean-Agile Leaders
- * Scrum Masters
- * Product Management
- * Business Owners

NO.63 An effective Scrum Master is a team-based servant leader who helps the team do what?

- * Embrace relentless improvement through Iteration retrospectives

- * Understand and operate within Lean Budgets
- * Develop better and more specialized skill sets
- * Manage the team's own backlog
