C_ACT_2403 Dumps 2025 New SAP C_ACT_2403 Exam Questions [Q34-Q52

C_ACT_2403 Dumps 2025 - New SAP C_ACT_2403 Exam Questions
Free C_ACT_2403 braindumps download (C_ACT_2403 exam dumps Free Updated)

Q34. Comparing the SAP Activate methodology with Waterfall, what activities are performed by the new project roles?
* Product owner to discuss schedule with the customer
* Scrum master to prepare the project plan
* Scrum master and project sponsor to define the project charter
* Scrum team to review best practices
In Agile methodologies like SAP Activate, Scrum teams are responsible for reviewing and applying best practices to ensure effective solution implementation. Unlike Waterfall, where project managers control most activities, Agile teams are self-organized and collaborate on continuous improvement.

Q35. According to the Definition of Done, which activity must be completed for each Sprint?
* Configuration must be transported to the production system.
* Functionality must be released to the business.
* Refinement of user story description must be completed.
* The solution must be built and configured in the development system.
The Definition of Done specifies that all work for a sprint must be completed in the development system to ensure that each increment is ready for potential release. This includes configuration, testing, and documentation, preparing the solution for further

testing and deployment.

Q36. What are the responsibilities of the product owner in release and sprint planning? Note: There are 2 correct answers to this question.
* Estimate the backlog user stories.
* Define objectives for each release.
* Analyze the functional and technical dependencies between user stories.
* Prioritize backlog user stories by business priority.
The product owner’s responsibilities include defining objectives for each release to align with business goals and prioritizing backlog items by business priority to ensure high-value deliverables are completed first. While the team estimates user stories, the product owner ensures clarity and prioritization.

Q37. Which of the following is used to perform configuration in SAP S/4HANA Cloud, private edition?
* SAP Central Business Configuration
* Self Service Configuration UIs (SSCUIs)
* IMG (Implementation Guide)
* SAP Solution Manager
In SAP S/4HANA Cloud, private edition, configuration is primarily performed using the IMG (Implementation Guide), which allows for in-depth system customization similar to on-premise systems.

Q38. How do you set up Scrum teams?Note: There are 2 correct answers to this question.
* Based on end-to-end processes like order-to-cash
* By type of work, like configuration Scrum, documentation Scrum, and testing Scrum
* As a cross-functional team covering multiple functions, like configuration, data loads, and v u testing
* Based on group size, but a minimum of 12 people
* A is correct because based on end-to-end processes like order-to-cash is one of the ways to set up Scrum teams. This way, the Scrum teams are organized around the business value streams that they support, and they have a clear understanding of the customer needs and expectations. This also helps to reduce dependencies and handovers between teams, and to optimize the flow of work.

* C is correct because as a cross-functional team covering multiple functions, like configuration, data loads, and testing is one of the ways to set up Scrum teams. This way, the Scrum teams have all the skills and competencies that they need to deliver a complete and working product increment in each Sprint. This also helps to increase collaboration and communication within the team, and to foster a sense of ownership and accountability.

Q39. Which of the following are SAP Activate workstreams?Note: There are 2 correct answers to this question.
* Change Management
* Project Management
* Extensibility
* Data Migration
* B is correct because Project Management is one of the SAP Activate workstreams. The Project Management workstream covers all the activities related to planning, executing, monitoring, controlling, and closing the project. It includes tasks such as defining project scope, schedule, budget, resources, risks, issues, quality, communication, and stakeholder management.

* D is correct because Data Migration is one of the SAP Activate workstreams. The Data Migration workstream covers all the activities related to preparing, extracting, transforming, validating, and loading data from legacy systems to SAP systems. It includes tasks such as defining data migration strategy, scope, approach, tools, roles, responsibilities, quality criteria, and testing scenarios.

Q40. What accelerator can help you document the configuration definition in the Explore phase?
* Data definition
* Change request template
* Test strategy
* Backlog template

* D is correct because the backlog template is an accelerator that can help you document the configuration definition in the Explore phase. The backlog template is a document that contains the user stories that describe the configuration requirements and gaps for each scope item. It also includes the acceptance criteria, priority, effort estimation, and dependencies for each user story. Verified References:

* : SAP Activate Project Management Certification Guide, page 123

Q41. Which accelerators support the fit-to-standard workshop in the Explore phase? Note: There are 2 correct answers to this question.
* Test strategy document
* Requirements feature in SAP Cloud ALM
* Quality gate checklist and quality gate guide
* Business-Driven Configuration questionnaire

* B is correct because the requirements feature in SAP Cloud ALM is an accelerator that supports the fit-to-standard workshop in the Explore phase. It allows the project team to capture and manage the user stories that are identified during the workshop, as well as link them to the relevant scope items and test cases.

* D is correct because the Business-Driven Configuration questionnaire is an accelerator that supports the fit-to-standard workshop in the Explore phase. It provides a set of questions that help the project team to understand and document the customer’s business requirements and configuration settings for each scope item. Verified References:

* : SAP Cloud ALM

* : Business Driven Configuration Questionnaire

Q42. Who determines the tasks that are required to complete the committed backlog items in a Sprint?
* Scrum team
* Product owner
* Scrum master
* Project manager

A is correct because the Scrum team is the one that determines the tasks that are required to complete the committed backlog items in a Sprint. The Scrum team is a self-organizing and cross-functional group of people who work together to deliver a potentially releasable increment of the product at the end of each Sprint.

The Scrum team breaks down the user stories into smaller and manageable tasks, and assigns them to the team members based on their skills and availability.

Q43. Which accelerators support the fit-to-standard workshop in the Explore phase? Note: There are 2 correct answers to this question.
* Quality gate checklist and quality gate guide
* Business-Driven Configuration questionnaire
* Test plan document
* Requirements feature in SAP Cloud ALM

The Business-Driven Configuration questionnaire helps gather business requirements relevant to SAP Best Practices, while the Requirements feature in SAP Cloud ALM supports capturing requirements and gaps identified in fit-to-standard workshops. Both accelerators streamline the process of configuring the system to meet business needs.

Q44. Which of the following activities take place during the Discover phase in an SAP BW/4HANA implementation? Note: There are 2 correct answers to this question.
* Create, review, and sign off the Project Charter.
* Discuss the benefits and functionality of SAP Analytics Cloud.
* Create, review, and sign off the Project Management Plan.
* Discuss the benefits of SAP Data Warehouse Cloud.
In the Discover phase of an SAP BW/4HANA implementation, high-level discussions on the benefits of related tools like SAP Analytics Cloud and SAP Data Warehouse Cloud take place. This phase focuses on exploring and understanding available functionalities to inform decision-making.

Q45. When does the Scrum team receive formal confirmation that the user stories are completed to the satisfaction of the product owner?
* During the user acceptance test
* During the sprint retrospective
* During the daily Scrum meeting
* During the sprint review
* D is correct because the sprint review is the event where the Scrum team receives formal confirmation that the user stories are completed to the satisfaction of the product owner. The sprint review is a meeting where the Scrum team demonstrates the functionality that they have built and configured in the sprint, and the product owner provides feedback and acceptance. Q46. Which of the following are capabilities of the test automation tool for SAP S/4HANA Cloud, public edition?Note: There are 2 correct answers to this question.
* Raises test defects automatically
* Supports recording of transaction-based processes
* Captures test results with screenshots
* Supports the creation of custom test automates
* B is correct because the test automation tool for SAP S/4HANA Cloud, public edition supports recording of transaction-based processes. This means that the tool can capture the user actions and inputs during a transaction and generate a test script that can be replayed later.

* D is correct because the test automation tool for SAP S/4HANA Cloud, public edition supports the creation of custom test automates. This means that the tool allows the user to modify the existing test scripts or create new ones from scratch, using a graphical user interface or a scripting language. Verified References:

Q47. When working with an Agile approach, what is the minimum planning requirement expected at the beginning of the Realize phase?
* Sprint planning and sprint durations should be defined for the first 2 to 3 sprints.
* Realize phase scope, planning, and budget should be completed and final.
* User stories on the product backlog should be in a ready state for the first 2 to 3 sprints.

* Release plan and sprint ceremony guidelines should be finalized.

At the start of the Realize phase, basic sprint planning and duration for the first few sprints should be established to ensure a smooth start. This approach supports incremental development by setting priorities and defining the immediate tasks for the project team.

Q48. Which tool do you use to configure SAP S/4HANA Cloud, public edition?

* SAP Central Business Configuration
* IMG (Implementation Guide)
* SAP Solution Manager
* SAP Cloud ALM

SAP Central Business Configuration is the primary tool for configuring SAP S/4HANA Cloud, public edition. It provides a centralized interface for managing configuration settings across SAP cloud environments.

Q49. What can you find in the SAP Fiori apps reference library? Note: There are 3 correct answers to this question.

* Shortcut to the Maintenance Planner tool to establish the technical update path
* Related app recommendations based on your usage profile
* Shortcut to the Quicksizer tool to estimate hardware requirements
* Installation and configuration requirements for selected apps
* Related app-specific solution design guidelines

The SAP Fiori apps reference library provides app recommendations, installation and configuration requirements, and solution design guidelines. It serves as a comprehensive resource for information about SAP Fiori apps to support implementation and customization.

Q50. What can you find in the SAP Fiori apps reference library? Note: There are 3 correct answers to this question.

* Shortcut to the Quicksizer tool to estimate hardware requirements
* Installation and configuration requirements for selected apps
* Related app-specific SAP Fiori design guidelines
* Shortcut to the Maintenance Planner tool to establish the technical update path
* Related app recommendations based on your usage profile

* B is correct because installation and configuration requirements for selected apps are one of the things that you can find in the SAP Fiori apps reference library. The SAP Fiori apps reference library provides information on how to install and configure each app, such as required software components, backend configuration steps, and frontend configuration steps.

* C is correct because related app-specific SAP Fiori design guidelines are one of the things that you can find in the SAP Fiori apps reference library. The SAP Fiori apps reference library provides links to the app-specific design guidelines that describe the user interface and interaction patterns of each app, such as layout, navigation, controls, and dialogs.

* E is correct because related app recommendations based on your usage profile are one of the things that you can find in the SAP Fiori apps reference library. The SAP Fiori apps reference library provides suggestions on other apps that might be relevant or useful for you based on your role, industry, or business area.

Q51. Which new project roles are introduced with the SAP Activate methodology for the Agile delivery approach, compared to Waterfall?Note: There are 2 correct answers to this question.

* Scrum master
* Product owner
* Design thinking coach
* Integration lead

* A is correct because the scrum master is a new project role that is introduced with the SAP Activate methodology for the Agile delivery approach, compared to Waterfall. The scrum master is responsible for facilitating and coaching the Scrum process, removing impediments, and ensuring the team’s adherence to the Agile principles.

* B is correct because the product owner is a new project role that is introduced with the SAP Activate methodology for the Agile delivery approach, compared to Waterfall. The product owner is responsible for defining and prioritizing the product backlog, accepting or rejecting the user stories, and providing feedback and guidance to the team. Verified References:

* : SAP Activate Project Management Certification Guide, page 111

Q52. Which functionality is available in Focused Build?
* User Experience Monitoring
* Test Management
* Integration Monitoring
* Custom Code Management
* B is correct because Focused Build provides a test management feature that supports the planning, execution, and reporting of test activities in SAP projects. It allows the creation and assignment of test cases, test packages, and test plans, as well as the tracking and monitoring of test results and defects.
